h. daniel smith • 422 euclid avenue • syracuse, new york 13210

Permit me the privilege of inserting an *errata* sheet, incomplete though it may be.

On page 7, there should be a footnote: The *Sundara-kāṇḍa* will be translated by
    Professor Goldman, while the translator of the *Aranya-kāṇḍa* has not yet been
    announced.

On page 23, note that in the USA the Amar Chitra Katha series is now handled by Famous
    Overseas Corporation, 45-15 Barnett Avenue, Long Island City, NY, 11104.

On page 45, there should be a footnote: It was K.A. Nilakanta Sastri who described
    the *Rangaṇātha Rāmāyaṇa* as "...a work of great simplicity and sweetness and full of
    apt similes," p. 391, A History of South India (Madras: Oxford University Press,
    1955).

On page 51, line 15, change "nearly half again" to read "scarcely half."

On page 55, end of first paragraph, fill in the blank with "108ff."

On page 81, line 4, change "less out of necessity" to read "less of a necessity."

On page 82, line 15, change "(then Ceylon)" to read "(i.e., Ceylon)".

I wish to thank Mary Beth Ritter for her typing of the manuscript as well as for her
design of the cover and layout of the map. I wish also to thank Guy Beck for his help
in proofreading the camera-ready copy. There are *many* mistakes which remain in the
text, and for those I assume full responsibility. I shall be grateful to hear from
readers who are able to help me correct those mistakes.

Foreword

        Readers who turn to the *Rāmāyaṇa* for the first
time will find it useful to know that many different
versions of the story of Rāma are currently in circu-
lation. Some are survivals from early centuries.
Others are of more recent invention. All testify to
the fascination that the adventures of the exiled
Prince of Ayodhya have had through the ages for the
multitudes who inhabit broad stretches of South and
Southeast Asia, not to mention more recent admirers
in the West.

        One historian of the tradition, Father Camille
Bulcke, has enumerated and identified approximately
300 texts based on the Rāma-story in India alone.*
This figure is the more impressive when one adds to
it the numerous pageants, folk dramas, song cycles,
dance performances and communal celebrations known
throughout the land which, although based on the
Rāma-legend, do not qualify as conventional texts.
And, if one takes into account the innumerable varia-
tions--whether literary documents or popular perfor-
mances--in countries beyond India where the influence
of the *Rāmāyaṇa* has been felt, the cultural impact of
this story represents a phenomenon of major propor-
tions.

        This essay undertakes to focus mainly on the
literary variants of the Rāma-theme which originated
in India and, moreover, limits its notice to works
available in the English language. References are
made for the most part to full translations from the
languages of the Indian originals; occasionally, how-
ever, attention is called also to substantial out-
lines and to freely rendered résumés in English which
may be deemed useful for study. The titles mentioned
here are but a small sampling of the mass of litera-
ture produced in Sanskrit and Prakrit, as well as in

----

        *
        Ramkatha-Utpatti aur vikas (Hindi). Allahabad:
Hindi Parishat, Prayag Visvavidyalaya, 1962 (2nd edi-
tion; orig., 1950). English translation by R.K. Barz
due for early publication from Australia.

the more modern Indian vernaculars, based on the
perennially rehearsed story. It will suffice, how-
ever, to serve as a guide for highly motivated
college students and their teachers who may wish to
acquaint themselves, through further reading, with
variants of the Rāma-theme other than Vālmīki's.

Most, if not all, of the citations made in this
bibliography refer to documents housed in North
American libraries. Many of the titles referred to
will be found duplicated in several locations. Some,
however, are rare. One in particular (see [78],
infra) seems to be unique, for which reason I am
indebted to Dr. Maureen Patterson for having made
known to me its availability at the Regenstein
Library (University of Chicago). With fewer than
half-a-dozen exceptions, I have looked at all of the
works listed in the following pages. Those which
were not part of the holdings of Bird Library (Syra-
cuse University) were located and examined by making
site visits to the following places: American Orien-
tal Society Library, Boston Public Library, the
Library of Congress, New York Public Library, Olin
Library (Cornell University), Sterling Memorial
Library (Yale University), the John G. White Collec-
tion of Folklore, Orientalia and Chess (Cleveland
Public Library), and Widener Library (Harvard Uni-
versity). I wish to thank the staff members at those
above-named places for their patience and resource-
fulness while helping me during my visits.

STATEMENT OF THE THEME
IN VĀLMĪKI

Before considering the variants in Indian liter-
ature of the tale of Rāma, it will be useful to pause
over the Vālmīki version, often acclaimed as the
"foremost" [*ādi-*] among all other retellings of the
story. Because Vālmīki's *Rāmāyaṇa* is available in so
many English renderings--some justly celebrated,
others deservedly obscure--it is not practical to
make note of all of them here. This opening section
will attempt to identify only some of those rendi-
tions which are most likely to be encountered by one
who, as a beginning student, turns to read the epic.

Renditions of Vālmīki

(1) [Forthcoming] Goldman, R.P. and Nathan, L.E. (eds.) A new translation of Vālmīki's *Rāmāyaṇa*, based on the Baroda Critical Edition of the Sanskrit text, with annotations. Princeton: Princeton University Press, 1980s. 7 volumes, to be issued approximately annually starting in 1984.

The inexperienced reader who comes upon a rendition purporting to be Vālmīki's *Rāmāyaṇa* should be prepared to assess it immediately on at least two counts. The first is length. As the version of the *Rāmāyaṇa* by Vālmīki which has come down through the centuries is quite long, the length of the version in hand may be an important criterion by which to judge it on a preliminary basis.

To be sure, scholars have different opinions in regard to how much of the bulky classic originated with Vālmīki, how much is pious addition by later hands. But whatever the original "core" may once have been, it is an extended version that tradition has handed down for well over a millenium. That traditional version comprises seven sizable sections containing altogether more than 600 chapters. So, first of all, a full rendering of Vālmīki's *Rāmāyaṇa* will be rather long.

The second assessment has to do with form. The beginning student should be reminded that Vālmīki's original creation was a poem, written in verses of the so-called "*śloka*"-meter. It was not composed as a prose piece. So, whether a rendering is in verse or in prose becomes a pertinent concern.

With these two considerations in mind, the student may deduce from the length and format of the work in hand that it is (a) a complete translation or (b) a condensation, either of which may be in the form of prose or verse. It is possible, of course, that the rendering may be neither of the preceding but rather something else: (c) an imaginative recasting of the story by an author who adds a characteristic, often personal touch to the narrative. All of these variants are circulated, in India and abroad, as the "Vālmīki *Rāmāyaṇa*." In English-speaking countries, many such variants are marketed for classroom use, and most are listed as well in library catalogs under "Vālmīki--*Rāmāyaṇa*." Reader, beware! The following descriptions will assist the student and instructor to identify what may be under consideration for use within the context of other, available renderings in English of Vālmīki's version of the Rāma-story.

Translations

Just beginning to make its appearance through
Princeton University Press is a seven-volume trans-
lation of the complete epic (1). This new transla-
tion will not be based on the traditional, "vulgate"
text of the *Rāmāyaṇa* followed by most earlier trans-
lations; rather, it will set a new standard by
basing its readings on the recent, "critical edi-
tion" produced by a team of eminent textual scholars
at the University of Baroda in India. This new
translation, with annotations, has been undertaken
by a consortium of professors from three countries,
the United States, Canada, and England, and is pro-
ceeding under the general editorship of R.P. Goldman
and L.E. Nathan, both of the University of Califor-
nia at Berkeley. The *"Bāla-kāṇḍa"* translated by
Professor Goldman and scheduled to appear first,
will be followed at irregular intervals by other
*kāṇḍa*s one by one until all seven have been pub-
lished. Among others comprising the *Rāmāyaṇa* Trans-
lation Consortium are: Sheldon Pollack of the Uni-
versity of Iowa (*"Ayodhyā-kāṇḍa"*); J.M. Masson and
R. Lefeber, both of the University of Toronto
(*"Kishkindhā-kāṇḍa"*); B.A. van Nooten, University
of California at Berkeley (*"Yuddha-kāṇḍa"*); and
B.K. Matilal of Oxford University (*"Uttara-kāṇḍa"*).
This scholarly prose translation, with its annota-
tions, should facilitate access to the subtleties of
the Sanskrit poem for serious readers unable to cope
with the original.

Meanwhile, other translations based on the tra-
ditional, or "vulgate," text are available and
remain useful. Perhaps the two best among those
currently circulated are published in three volumes.
The earliest of these, by the late Hari Prasad

Shastri, is now in its third edition. It is available in paperback (2). Here the entire epic is set forth in readable English prose. Each volume is furthermore provided with lengthy appendices which identify most of the proper names of characters, weapons, and flora so formidable to neophyte readers upon first venturing into the story. While Shastri's prose lacks the cadence and obvious syntactic virtuosity of the original poem, he was nonetheless a conscientious translator, and to his credit it may be said that he adhered to the text with admirable consistency. His style is clear, and with it he succeeds in transmitting a craftsmanlike approximation in prose of the ancient masterpiece.

Much the same may be said of the other, more recent translation by N. Raghunathan (3). This version comes printed in relatively large typeface, and is commendably free of the composing errors which so often plague Indian publications. Only its last volume, however, contains a modest, yet useful, glossary. There are brief but informative essays at the beginning of the first and third volumes (22 and 5 pages respectively, the former of a general, introductory nature, and the latter dealing with the "problem" of the "*Bāla*" and "*Uttara*" *kāṇḍa*s). Teachers familiar with Sanskrit may prefer to use Raghunathan's version because it retains diacritically correct transliterations of proper names and technical terms, while Shastri anglicized his renderings. Raghunathan's hardcover, due to favorable exchange rates and lower production costs, also turns out to be cheaper for classroom use than Shastri's paperback.

For those who may wish to refer to the Sanskrit text as they read a verbatim translation into English prose, another three-volume Indian

publication is worthy of mention (4). While the
prose style lacks conviction and polish, it is
nevertheless useful for students with a rudimentary
grasp of the Sanskrit language. The numbered
sequences on the lower half of each page correspond
to *śloka*-verses in Devanāgarī script from the vul-
gate text on the upper half of the same page, so
that users of this publication may easily refer to
the proper verse in the traditional words of the
poem. Unfortunately, the translator died before his
task was completed; but he did get as far as the
41st chapter of the "*Uttara-kāṇḍa*." Thus this ver-
sion, although it lacks chapters 42 through 111 of
the final section, provides access to a hefty 90
percent of the massive epic. It is now out of print
in India, although still available with many book-
sellers. In the U.S.A., copies of this rendering
of the *Rāmāyaṇa* will occasionally be found in book-
shops catering to those sectors of the American sub-
culture committed to one or another of the popular
personality cults of Hindu origin; the publication
is also available through some North American book-
sellers who deal in South Asian literature. The
price for the three-volume set remains remarkably
low.

Yet another complete translation of the poem
into English prose is available. It was produced
late in the nineteenth century by the Indian scholar,
M.N. Dutt (5). There is nothing about this render-
ing to recommend it, however adequate it may have
been to readers in its own day.

The enormous and enterprising task of transla-
ting the entire epic into English verse was under-
taken by Ralph T.H. Griffith during the 1870s. His
magnum opus (6) is in the form of rhyming octosyl-
labic couplets. It is altogether an impressive, at

times moving, and thoroughly Victorian rendering of the Vālmīki poem which manages to preserve much of the flavor of the original. It is not, however, something that will long hold the attention of undergraduates unaccustomed to reading verse. A condensed version of this tour de force is available (13), and it is described below.

Condensations

Anything shorter than the full poem in seven substantial sections comprising more than 600 chapters has to be either a condensation of the original or a total recasting of the narrative. For the undergraduate to whom the world of Vālmīki is an alien universe, it may indeed be preferable to begin with an acceptable condensation. An editor usually accomplishes an abbreviation of the Rāma-story by expediently cutting out everything but the basic, narrative elements of the unfolding "plot." Reduction of size inevitably results in alteration of scope; gone will be lengthy, conventional descriptions and poetic nuances, as well as minor characters and subsidiary events. At best, what remains will still have some of the mystery and ambiguity of the unexpurgated original.

The readily available condensations of the Vālmīki *Rāmāyaṇa* vary considerably in size and style. If the epic of the exiled Prince is but one of several reading assignments a student is expected to complete in a survey course, the shorter the acceptable condensation is, the better it meets pedagogical needs. Without doubt, one of the best among the shorter condensations is that done early in this century by A.K. Coomaraswamy (7). Well-written, sensitive to essentials of the narrative structure

and to charaterization, this is a rendering of the
story admirably suited to a short reading assign-
ment. The student must be forewarned, however, that
to skim the fewer than 100 pages of fairly large
print within which Coomaraswamy rapidly recapitu-
lates the narrative is to risk missing significant
details he has so artfully included. Gone, regret-
tably, is the overall structure of the seven sec-
tions and their respective chapters; in compensation
are topically titled subheadings which mark divi-
sions of Coomaraswamy's exposition.

    Closer to the original than Coomaraswamy's brief
recapitulation is the somewhat longer and stylisti-
cally more formal condensation in prose by the late
V. Raghavan (8). Unfortunately, Raghavan's retel-
ling is not as easy to locate and to procure as is
Coomaraswamy's. Written in lucid prose, the 140
pages of this résumé deserve to be republished
separately in an economical paperback format in
order to reach the wider audience of students who
would benefit from a rendition which remains in so
many important ways so faithful to the original. In
it, the structure of the original seven $k\bar{a}ṇḍa$s is
preserved, along with many of the significant
details and imaginative nuances of the Vālmīki poem.
One may turn to it with confidence. Because it is
brief, it is also suitable for a short-span reading
assignment.

    Considerably longer, and a faithful recapitula-
tion of the tale so far as it goes, is a rendering
of the *Rāmāyaṇa* called *The Prince of Ayodhya* (9).
Written by the late, great scholar D.S. Sarma, this
accurate rendering is graceful and charming. Its
greatest flaw is that in its narrative it goes only
to the end of the *"Yuddha-kāṇḍa."* All of the mater-
ial in the *"Uttara-kāṇḍa"* is thus omitted. For

those who take seriously the integrity of the Vāl-
mīki version as it has been transmitted for centur-
ies--with seven *kāndas*, including the vexsome fea-
tures of Sītā's second Fire Ordeal and her final
abandonment by Rāma, followed by their separate apo-
theoses--this truncated version by Sarma presents
some learning problems. Perhaps Sarma presented the
story as he did in order to provide a "happy end-
ing" to the tale; another way to look at what he
presents is that it accords, not incidentally, with
the structure of the version of the Rāma-story made
popular in South India by Kamban--and Sarma was a
South Indian. Still, this version scarcely does
justice to the enigmatic grandeur of Vālmīki's power-
ful vision. Thus students assigned to Sarma's ren-
dering should be thoroughly apprised of its short-
coming.

To be sure, it may be a disservice to Sarma to
refer to his truncated presentation as a "happy end-
ing" version of the tale, and even more so to view
this as a shortcoming. Surely, it is more than mere
"sentiment" that has prompted Hindus for a long time
to reject the repetitive elements and the unflatter-
ing characterization of King Rāma found in Vālmīki's
"*Uttara-kānda*." Indeed, many devotees of the Rāma-
story discard out of hand the entire seventh *kānda*
of the vulgate Vālmīki version as a "later addition."
This is not the place to argue this complicated set
of issues (see, however, the discussions of Kālidāsa
and of the Jaina Rāma stories, pages 79 and 111,
respectively). Suffice to say that Sarma defers to
popular Hindu sentiment when he ends his narrative
account with Rāma's coronation. Other translators
have likewise edited out the entire, final section
of the traditional Vālmīki version of the story

(see, for example, [10], which, however, contains a
33-page glossary of terms and characters). Their ver-
sions may otherwise be quite commendable; but those
responsible for them are disingenuous insofar as they
do not make absolutely clear that they have tampered
with the received text. And, their versions are not
useful to those who are concerned with learning about
the Vālmīki text as tradition has preserved it.

     Although characterized elsewhere as "... a free
and often inaccurate translation of dubious worth,"*
Makhan Lal Sen's rendering of the *Rāmāyaṇa of Vālmīki*
(11) should not be dismissed too hastily. A student,
given more than a quick week or two to spend on the
epic, may read this condensation with great profit.
Although it, too, is an abbreviated version, it is
nonetheless a substantial one. It preserves 306 of
the more than 600 chapters of the Vālmīki original,
as well as the structure of the seven *kāṇḍa*s. Both
features constitute a plus for serious students. In
his prefatory remarks, Sen comments that what he has
pruned from the original is "literary prolixity and
mere verbosity ... where it has encroached upon the
main narrative, or clouded the real issue, or rendered
the whole piece a tedious reading." On the whole, he
has produced a very readable condensation which con-
veys both the sweep and the detail intrinsic to the
original. To be sure, the quality of the translation
is at least awkward now and then [" ... you is ..."];
nor is the transliteration system always consistent.
Morover, the numbering of Sen's chapters inevitably
differs from the original; thus it is difficult for
students to locate in this rendering specific passages

---

     *
     A Guide to Oriental Classics. New York: Colum-
bia University Press, 2nd edition, 1975, p. 73.

to accord with references from the Vālmīki version.
And, as a learning tool for students new to the Rāma-
story, Sen's most serious flaw is his omission of a
glossary of terms together with a guide to major
characters.* But in this he was not alone; only two
of the preceding renderings reviewed above provide
glossaries. Sen's condensation originally appeared
as a three-volume set in 1927; recently it has been
attractively reprinted and bound as a single volume
in India, where it is available in either hardcover
or paperback format. In the early 1980s, it could be
ordered in the U.S.A. for well under $15.00 (India
retail: Rs. 80/-). For the money, it is the
second-best choice currently available for college-
level students, after the full translations already
noted. Without a doubt, it is preferable to Buck's
imaginative reconstruction of the story (14), which
is only a bit shorter and considerably cheaper, and
which is discussed more fully below.

An "adaption" (presumably a condensation of some
kind) based on Shastri's three-volume prose transla-
tion is available in some libraries (12), but it is
difficult to come by since it has long been out of
print (224 pp., illustrated). Thanks to an Indian
publishing house, however, the verse translation by
R.T.H. Griffith, already noted above (6), is also
available in a condensed version (13). Here the five

---

*For those interested in classroom use of Sen's
version, the compiler of the bibliography in hand has
prepared a user's guide to the revised, second edi-
tion of Sen's *The Rāmāyaṇa of Vālmīki*. Among other
things, the guide contains an extensive glossary and
index as well as other corrective data and instruc-
tional materials, including maps and charts. See
*The Asian Story of Rama: Religion 108 Student Hand-
book* (Syracuse: Syracuse University Center for
Instructional Development, 1983, 2nd edition).

volumes have been reduced to one, mainly by resort-
ing to very small print. This abbreviated version
lacks the "*Uttara-kāṇḍa*," an omission already faulted
in the evaluation of Sarma's and Subramaniam's rendi-
tions of the epic. Griffith also omits some 13 chap-
ters from the fifth *kāṇḍa*, and 28 chapters from the
sixth. Even in this somewhat abbreviated form,
it is unrealistic to suppose that contemporary under-
graduates--Western or Indian--would suffer gladly
the repetitious rhythm of the rhymed couplets.

Recastings

The high-risk nature of translating a lengthy
classic poem, coupled with the sheer fascination that
the epic tale evokes in those who consider it ser-
iously and for a sustained period, have tempted many
English-language writers simply to "retell" the
basic story in their own words and in a way that will
most deeply affect their readers. In this they are
little different from the countless composers
throughout South and Southeast Asia who have been so
intrigued for so many centuries by the Rāma-theme
that they have recast it in their vernaculars and in
formats readily accessible to their countrymen.
Here only nine or ten of the many, widely circulated
recastings of the Rāma-story in English are noted--
all but one of them in prose. The main concern in
reviewing them here is to note to what extent each
one conveys something of the Vālmīki original.
    In recent years, one of the most visible ver-
sions of the Rāma-story in North American bookshops
has been the late William Buck's *Ramayana: King
Rama's Way* (14). This is, in fact, based only gen-
erally on as much of Vālmīki as was known to him
through published English versions of the epic,

enhanced somewhat by the lore layered onto the story
by some of his unidentified informants. In this, the
original structure of the *kāṇḍa*s is replaced by a
divisional structure of the author's own invention.[*]
Buck himself states in his preface, "My motive is
that of the storyteller.... I have made my own
changes to tell the story better.... I tried to make
... [it] interesting to read." While this did indeed
result in an extremely readable prose version of the
Rāma-story, it is more Buck's inventive recasting of
the theme than it is Vālmīki's *Rāmāyaṇa*, the result
being considerable rearrangement[#] and the free intro-
duction of episodes and characters which deviate from
the Vālmīki original.

An even stronger warning must be issued against
what purports to be "the central section of the San-
skrit epic" advanced by Maurice Collis (15). This
easy-to-read paperback is in fact the story told
from the perspective of Sītā, here made the central
character. The author speaks thus of his main
motive: " ... that while preserving the main outline
of her story he [the author] should vivify it by
passing it through his own imagination." That,

---

[*] Even so, the original seven sections may be
discerned within pages 3-59, 60-135, 138-193, 194-
223, 223-270, 270-388 and 389-432 respectively of the
hardcover edition, and within pages 3-48, 49-110,
113-157, 157-182, 182-220, 221-317 amd 318-352 of the
paperback edition.

[#] Buck begins his narrative by introducing the
*rakshasa*s and establishing the greatness of Rāvaṇa.
In this, of course, he follows a pattern established
in the "Rāmopakhyāna" section in the *Mahābhārata* and
in such other early works as the Jaina *Paumacariya*,
for which see (103) and (136), below. But his
arrangement scarcely accords with Vālmīki's, whose
version he purports to present.

indeed, Collis did. Not only has he given a totally
one-sided view of the multidimensional original, but
he has also stitched onto his handiwork embroidered
episodes featuring Hanumān, Jaṭāyus and Saṁpati as
well as a number of animal fables not found in Vāl-
mīki. While Collis wrote prose well, and while his
creation remains entertaining fare, it has little to
recommend it as a source for serious study of the
classic *Rāmāyaṇa* by the original author.

　　To several generations of classroom readers,
R.C. Dutt's English verse condensation of the *Rāmā-
yaṇa* (16) has been the medium through which they
first learned the story of the exiled Prince. It has
been, and still is, a useful learning tool. It is
brief--it transmits only some of the major episodes
and characters of the Vālmīki original--and it is
written in iambic octameter couplets to approximate
the elevated cadence of the epic's *śloka*-verses. It
is listed in this section of the bibliography as a
recasting, rather than above as a condensation,
because in fact Dutt creates a narrative not merely
quantitatively but, more importantly, qualitatively
different from the text upon which it is based. By
concentrating on the main narrative events, and
omitting most descriptions, all didactic sections
and the many minor stories, this in effect becomes
an altogether different "*Rāmāyaṇa*." One effect of
Dutt's radical selectivity, for example, is that the
figure of Sītā emerges much more prominently here
than in the original, while characters such as Lak-
shmaṇa, Rāvaṇa, Sugrīva, et al., recede to mere
shadowy presences. Not only is the delicate balance
of the narrative upset, but events of the "*Uttara-
kāṇḍa*" are minimized by relegating them to an
appended epilogue. Despite the irony of all this,

Dutt's version is still useful for students able to
scan poetry (see remarks, pages 9*f.* and 15, respec-
tively, in regard to verse renderings of the epic),
and it is generally available at a modest cost in
numerous reprints and anthologies.

Probably the most popular English presentation
of the *Rāmāyaṇa*, at least in India, is the one by
C. Rajagopalachari (17), India's first native son to
serve after Independence as Governor General of the
new nation. This widely disseminated version began
many years back as a condensation of the Vālmīki epic
into Tamil, a South Indian language, for South
Indians unable to read either the Sanskrit original
or any of its English renderings. He called it, in
Tamil, *Cakravartittirumagan*. In Tamil Nadu, this
retelling became immensely popular, even rivaling
the original Vālmīki as well as the beloved regional
version in classical Tamil, the *Irāmāvatāram* by
Kamban (see [36] through [46], below). Throughout,
"Rājajī" interspersed the episodes of Rāma and Sītā
with moralizing homilies reflecting his own, widely
respected views, and he freely interpolated numerous
original illustrations and contemporary reflections.
Rajagopalachari's Tamil version was as much his own
as it was Vālmīki's. In 1951, when "Rājajī's" Tamil
version was translated into English, it was also made
available in a modestly priced paperback. The
English-language version also became an instant
success, not merely in the South but throughout India.
In its first twenty years, Rajagopalachari's English
recasting of the *Rāmāyaṇa* went through more than a
dozen massive editions and, even though inflation has
increased its price in recent years, its sale is
still brisk. Students reading this version should
know that they have in hand, then, a version of the
ancient epic as it is currently known to many

Tamilians as well as English-reading Indians, for
which reason alone it is worth reading. It contains
a brief but helpful glossary.

The well-known South Indian novelist, R.K. Nara-
yan, has in more recent years produced a version of
the "*Rāmāyaṇa*" (37, 38) which the beginning student
might mistake for a work inspired by the Vālmīki
poem. It is not so. It is based, rather, on a
regional variant of the epic. Narayan's publication,
available at remarkably low cost in India and in a
modestly priced paperback in North America, is
noticed below, page 43.

Menon's crisp, prose reconstruction of the epic
(18) cannot be recommended at all as an introduction
to the original story. It is a parody of the ori-
ginal, based but loosely on some characters and
events generally associated with the Rāma-theme.
For the most part, in fact, Menon's story is sheer
invention, with character reversals distasteful to
anyone familiar with the tone of the original. While
the author may be admired for his narrative skill and
his enviable control of the language, it is not sur-
prising that his fanciful, sardonic presentation has
been roundly condemned in India.

Another "version" of the Rāma-story comes to
mind here. Strictly speaking, it is not so much a
retelling as it is a political tract. In it (19),
the author, who was founder of the South Indian
political party known as the Dravida Kazhagam,
de-mythologizes the ancient story, declaring that it
is nothing more or less than a fiction promulgated
by the *brāhmaṇas* of the North to justify their age-
old subjugation of the South and its noble citizens.
Accordingly, in his analysis Rāvaṇa becomes the true
hero (p. 40*f*.), by contrast with whom Rāma "was
wicked in thought and deed,... an embodiment of lies,

treachery, artifice and cunningness, hard-heartedness,
greediness, murder, drunkenness, flesh eating, arrow-
ing at the innocent covertly, wicked associations,
unmanliness and what not" (p. 5). By the same token,
Sītā was vain, lied about her age, of questionable
parentage, of loose morals, and pregnant by Rāvaṇa
due to her own wiles. There is, according to this
author, nothing divine about either of them, or about
any with whom they associated. "The story aims
solely at running down Tamils. The veneration of
the story any longer in Tamil Nadu is injurious and
ignominious to the self-respect of the community and
of the country" (p. iv). The effect of this politi-
cal pronouncement by the now-revered "E.V.R."
[d. 1973], and its invective unleashed against the
establishment, is in fact a new, politicized, propa-
gandizing recreation of the story as timely and per-
tinent to a survey of variations on the Rāma-theme as
any of the older, more formal reconstructions.

There are many other recastings and "transcrea-
tions" of the Rāma-story available in English today.
Some of those are very brief. Some are quite sub-
stantial. In order to conclude this first section,
only two will be dealt with here, both illustrated
versions. The first is a lively and colorfully
illustrated version by the Indian artist and movie
director, Bapu (20). It features more than five
dozen stylish, decorative pictures in shades of red,
green, blue, yellow, peach, black and white. The
format is inviting, and the text has been graded so
that primary school children "all over the world may
know of the great Epic from India" (p. 3). Yet the
text is inconsistently laced with words that even
some high school students will not know. The book
contains no glossary or other aids to those who use
it alone; outside of India, the volume was designed

for sale to schools with a multi-media learning
package that was, unfortunately, both bulky and
costly, and which presumably addressed some of the
users' learning needs. However attractive the draw-
ings, however noble the educational goals, Bapu's
final product--available in several languages, both
Indian and European--must be faulted because its
publishers have persisted in promoting it as
Vālmīki's version. It is not; rather, it is a pleas-
ant synthesis of folk-legends associated with the
Rāma-story woven into one, short (and sweet) narra-
tion. Several telling examples will suffice to
demonstrate how it departs from the Vālmīki story.
According to Vālmīki, Sītā was not born in the house
of Rāvaṇa (p. 12), nor did she push aside Śiva's
heavy bow with her little finger (p. 13). Rāvaṇa
was not, according to Vālmīki, one of the contes-
tants at the tourney for Sītā's hand (p. 18). King
Janaka gave away in marriage not only Sītā but also
Ūrmilā, Māṇḍavī and Śrutikīrti to Rāma, Lakshmaṇa,
Bharata and Śatrughna respectively (p. 20). Rāvaṇa
was not warned at this point in the story by "his
wise brother Vibhishana" to desist from his plan to
abduct Sītā, but by Marīcha (p. 34). Rāvaṇa does
not pick up the noble victim "along with a chunk of
earth" (p. 39), but carries her off bodily. Sītā's
jewelry did not reach a waiting Hanumān as a neat
package tied "in a piece of [Sītā's] saree" (p. 41).
Hanumān did not lengthen his tail to use as a throne
from which to deliver an ultimatum to Rāvaṇa (p. 53)
but, astonished at his splendor, instead spoke to
Rāvaṇa courteously as an emissary. In Vālmīki,
there is no episode with a squirrel, nor, according
to him, was the causeway made with "floating rocks"
(p. 58). Rāma and Lakshmaṇa were both immobilized by
Indrajit's serpent-weapon, not Lakshmaṇa only, and

both were revived by the touch of Garuḍa's wings,
not by Hanumān.* Rāvaṇa was slain not because he was
vulnerable in a particular spot, least of all his
belly, nor because Vāyu deflected Rāma's aim (p. 67),
but because Rāma used the invincible Brahmā-weapon.
Nor does the story "end" when Rāma is crowned king
(p. 71), for by cutting short the epic at that point
only 85 percent of it is recounted: omitted are the
marvelous and compelling events of the "*Uttara-*
kāṇḍa," a concluding section of the epic integral to
Vālmīki's vision. The truncating of the grand-scale
original in this way, a fault it shares with (17),
has already been noted in the reviews of numbers (9),
(13), and (16), and will be touched upon further in
regard to the regional versions by Tulsīdās, Kamban
and others, below. What Bapu's version does achieve,
however, is a popular account of the Rāma-theme
suitable for use with young people.

The other illustrated version noted here is a
project initiated by the present bibliographer in
collaboration with Indian and American colleagues.
Published in both India and North America (21, 22),
it too is addressed to young readers. This version
also features drawings to illustrate the story and,
although they are not in color, and are simpler
line-drawings, there are more of them. Finally, each
of the more than six dozen pictures is captioned by
a relevant *śloka*-verse from the Critical Edition of
the Vālmīki text, which verse is presented first in
Devanāgarī script, then transliterated into Roman

---

* Or, if it is Lakshmana's solo fight depicted
here, wherein he was rendered unconscious by a ser-
pent-weapon and later revived by a mountain of herbs,
his adversary was not Indrajit but Rāvaṇa himself
(pp. 63, 64). In any case, this sequence is not an
accurate rendition of the Vālmīki account.

letters, and finally translated into working English.
While this production, too, has its faults, its vir-
tue is that it sticks resolutely to the Vālmīki tell-
ing of the story. It is the only illustrated version
available to present the events described in the
"*Uttara-kāṇḍa*" (11 drawings). Finally, the American
Classroom Edition of this collaborative project pre-
sents a readable recapitulation of the tale which
preserves the seven-*kāṇḍa* structure of the original;
this retelling runs to some thirty pages and includes
many details omitted by other, shortened résumés.
A useful glossary and pronunciation guide are also
included in this same edition, items too seldom
found in versions of the *Rāmāyaṇa* which find their
way into classrooms.

Many other retellings of the Rāma-story are
available. They range broadly from comic books pub-
lished in several languages[*] to extracts of a devo-
tional nature. The above sampling is limited to
those publications which might most readily be con-
sidered by students and their instructors who are
committed to a serious study of the Vālmīki version
of the text.

VARIATIONS ON THE THEME

The Valmiki *Rāmāyaṇa* says of itself that it is
"... the greatest reservoir from which the poets
draw ..." [*paraṁ kavīnām ādhāram*--"*Bāla-kāṇḍa*" IV:26
=Baroda Edition I.4.20b]. This statement surely
proved to be an accurate prophecy during the succeed-
ing centuries. The original "*Ādikāvya*" (see page 75
for this term) did indeed provide the model for many
subsequent regional adaptations, as well as for
plays, didactic works, *kāvya*-poems and *mahākāvya*-
epics.

In the process of imitation there were, inevi-
tably, changes wrought in the story. The variants
seem to have reflected one or more of the following
trends:

a. In many cases, the retelling altered the
character of one or more of the figures prominent in
the story; e.g., Rāma was presented unambiguously as
an epiphany of Lord Vishṇu, and Sītā was declared
his eternal Consort; or, Rāvaṇa was considerably
ennobled and hence invested with tragic potentials;
or, Kaikeyī was made less guilty of blame; and so on.

b. Structural details within the story were
often changed; e.g., Rāvaṇa is made to appear ear-
lier in the tale, perhaps as one of the contestants
at Sītā's bridal tournament and even, in some cases,
as her father; or, the youthful Rāma and Sītā see
one another at some point prior to the contest for
her hand, thus introducing the element of romantic
"love at first sight"; or, minor details emphasizing
Sītā's chastity are introduced, such that, even
though she is captured by Rāvaṇa, she is never

actually touched by his hands, or it is so arranged
that only an "apparition" of Sītā is abducted; etc.

c. A common invention was to focus only on cer-
tain elements of the story; or to amplify on the
polity of Rāma's long reign; or to elaborate on the
long-standing enmity between the houses of Rāma and
Rāvana; or to cut short the narrative before the
events of the "*Uttara-kānda*"; or, to dilate upon the
supernatural, deceitful magic of the *rakshasa*s as
tricksters; and so on.

d. Yet another practice was to take only one
episode or sequence of events within the story and to
retell that section, embellishing it with elaborate
details and subtle nuances; or to recapitulate the
entire epic in brief but memorable fashion.

Although regionally popular versions of the
Rāmāyana in vernacular languages were by no means the
earliest versions of Rāma's story, as is demonstrated
in subsequents sections of this guide, they are per-
haps the most important for beginning students to
take note of at the outset. For, to many Indians of
a particular geographical or linguistic region, the
particular Rāma-story which circulates in their local
dialect is "the" *Rāmāyana*--they know no other. Stu-
dents new to *Rāmāyana* studies should not confuse
Vālmīki's original epic poem [*ādikāvya*] with any one
or more of the regional, or "*deśī*," variants.
Because of the influence of the many regional vari-
ants of the story upon the masses, these vehicles by
which the story was most widely disseminated and
successfully perpetuated locally countless times over
are reviewed first, even though doing so requires
skipping almost a millennium of thematic developments
since Vālmīki's creation. Then, in succeeding sec-
tions, other translated works are reviewed which,
both earlier and later, draw upon the Rāma-story.

[cf. 125-131.]

Most of the vernacular versions of the Rāma-
story appeared late in the so-called medieval period
of India's history, between the 12th and the late
16th/early 17th centuries. What prompted the propa-
gation of the story into the local languages at that
time was the result of a complex set of circumstances.
Suffice here to say that the popularization of the
story coincides with the emergence of the Rāma-cult
in the wake of the *bhakti*-movements then sweeping the
subcontinent. It is possible to name only some of
the better-known regional retellings as witness to
this remarkably widespread phenomenon. In northern,
Hindi-speaking areas, Tulsīdās' 16th century
Rāmacaritamānasa is still considered the epitome of
the epic. Yet in southern Tamil Nadu and Andhra
Pradesh, respectively, the multitudes honor Kamban's
(pre-?) 12th century *Irāmāvatāram* in Tamil and the
(pre-?) 16th century *Molla Rāmāyaṇa* in Telugu (with
the late 13th century *Raṅganātha Rāmāyaṇa*, also in
Telugu, running a close second). In Bengal, the late

14th century Kṛittivāsa's *Rāmāyaṇa* remains the popu-
lar version of the story. Elsewhere, in Gujarat,
Premānanda's 17th century and Girdhāradāsa's 19th
century versions in Gujarati hold sway, while in the
present-day state of Karnataka the so-called *Torave
Rāmāyaṇa*, composed in the late 16th century by
Narahari (alias Kumāra Vālmīki, "the young Vālmīki"),
is the most popular Kannada-language version.[*]
Malayalam speakers of Kerala honor the *Adhyātma
Rāmāyaṇa*, adapted late in the 16th century by
Ezhuttaccan from a Sanskrit model (see [128], below),
and Marathi speakers of Maharashtra State are
chiefly familiar with Śrīdhara's early 18th century
Rāmavijaya. By the same token, Oriya speakers of
Orissa State memorize the *Jaganmohana Rāmāyaṇa* (some-
times called the *Daṇḍi Rāmāyaṇa*) by the late 16th cen-
tury poet Balarāma Dāsa, while the text of the *Vicitra
Rāmāyaṇa* is popular there in the performing arts.
Other vernacular variants are circulated as far
north as Kashmir, Tibet and Khotan, and as far south
as Sri Lanka.

Not all of these popular regional versions are
available in English translations. Those which have
been translated or otherwise made available in the
form of lengthy descriptions or résumés are noted
more fully in the following paragraphs. The order in
which the titles are presented is roughly the order

---

[*] See also the discussion later in this biblio-
graphy, page 113*f.*, of the so-called *Pampa Rāmāyaṇa*,
a Jain version in Kannada, likewise popular.

[#] This bibliographical survey is intended to
cover only Indian variants of the Rāma-theme. For
information regarding variants in South, Southeast
and East Asia, see (155), below, especially its
bibliography, pages 169-182.

in which students new to the Rāma-theme are likely
to encounter them.

Tulsīdās' *Rāmacaritamānasa* (Hindi)

This is undisputedly the most widely distributed
regional version of the Rāma-story. Written during
the late 1570s/early 1580s in Awadhi, a well-
established dialect of the Hindi language, this mas-
terpiece is often referred to by Western observers
as "the Bible of Northern India." Hindi, now the
language of more than 160 million people, is used by
more than 30 percent of all Indians in business and
the professions, in education and the media; it is
the official language of the Government of India.
Consequently, any work in Hindi has a large number of
potential clients, especially in broad areas of
North India; the more so when the mode of expression
in Hindi (like Tulsīdās' transformation of the epic)
is so immediate in its impact, so evocative in its
moods, so eloquent in its testimony. Indeed, for
many Hindi-speaking millions, the mere reading or
hearing of the *Rāmacaritamānasa* by Tulsīdās [var.,
Tulasīdāsa] (1532-1623) is itself an experience of
religious magnitude. In this it is unusual, standing
out from among nearly all the other rehearsals of
the Rāma-story. It is staged annually as a massive
pageant, as a part of the festivities known as Rām
Līlā (see [151], below). Because of its power, no
less than its prestige and popularity, it is not
surprising that this Hindi version of the Rāma-story
has been translated into many other Indian languages.
Its influence thus reaches far beyond the Hindi-
speaking areas of the North, where it was nurtured,
to regions throughout the subcontinent.

As for English treatments of Tulsīdās' Hindi classic, there are too many to note all of them here. Attention is drawn to those few translations and condensations which are most likely to be found in Indian and American school libraries. For many years, the modern standard for a prose translation of Tulsīdās' masterpiece had been seen in Hill (23); but unfortunately, Oxford University Press has allowed that version to go out of print, and as of this writing has no plans to reprint that useful volume. In its place, students may turn with confidence to a revised edition of Growse (24); it has received good marks from several reviewers, this present edition standing at the end of a long line of precursors. One might also use S.P. Bahadur's remarkably less graceful, mixed prose-and-verse rendering found in the fourth volume of his six-volume translation of Tulsīdās' complete works (25), which version had earlier been made available as a separate publication (26). For those wishing access to the Hindi text along with its literal translation into English, the Gita Press edition (27) will be useful. Many libraries still have Macfie (28), which is more tolerable than any other, older prose translation. For a verse rendering, the most admirable is a two-volume edition by Atkins, handsomely produced in India (29). Of the several prose condensations or retellings of Tulsīdās currently on the market or in libraries, two deserve notice. The more simply told résumé, suitable both for high school students and for quick review by college students, is Ahluwalia (30). More flowery in its language is the scarce, but nonetheless useful, abstract by Shastri (31).

Students turning for the first time to Tulsīdās' *Rāmacaritamānasa* should be aware that it is far from

a simple replication in Hindi of Vālmīki's Sanskrit
original. Although both nominally and formally it
preserves the seven *kāṇḍa*-sections of the earlier
model (albeit with slight rearrangement of the divi-
sional contents), it is clear that the later author
transformed the earlier epic into his own hymn to
the Divine Rāma. In this, it appears that Tulsīdās
also knew and was influenced by other renditions of
the Rāma-story. Indeed, it can be demonstrated that
much derives from other sources.[*] Yet, clearly, the
Rāmacaritamānasa was Tulsīdās' own synthesis, won-
drously brought together by the impulses of his own
undeniable genius and fervent devotion. The most
important characteristic of Tulsīdās' work is that
throughout it, Rāma is depicted as none other than
Divinity Incarnate, God merely playing the part of a
mortal man. Given this premise, many details of the
traditional story had to be altered to accord with
the author's docetistic views. Even so (as with
Vālmīki so with Tulsīdās), there remain several pal-
pable ambiguities to pervade the work. At one level,
the alert reader is never sure whether the Rām of
Tulsīdās' devotion is the Divine Lord Vishṇu's
avatāra consonant with Viśishṭādvaita theology, or
the Absolute *brahman* of Advaita monism--a paradox
which piques as much as it puzzles the purist. At
another level, while Tulsīdās' world is still one in
which respect for guru/father/mother/elders/rulers/
*brāhmaṇa*s, etc., prevails, and while it is still a
system controlled by fate/destiny, and one in which

---

Charlotte Vaudeville, *Étude sur les Sources et la
Composition du Rāmāyaṇa de Tulsī-Dās* (Paris: Adrien
Maisonneuve, 1955).

curses and boons are irrevocable, nonetheless mys-
teriously, illogically, it is also a world over
which arches grace and the promise of release from
saṁsāra solely by devotion to the Supreme Lord.
Indeed, it is devotion to Rām that is a hallmark of
Tulsīdās' rendering of the story; even the mere
utterance of the Holy Name "Rām" is sufficient to
save the sinner.*

In the process of effecting his transformation
of the ancient epic, Tulsīdās introduced many other
changes as well. Gone are the conventions of *kāvya*,
the artificial rhetoric and elaborate poetic exten-
sions; these are replaced by an endless approxima-
tion, through similes and metaphors, to suggest the
grandeur of God's work among men. Rām's journey it-
self becomes a metaphor of strange, stirring
strength. Most of the other imagery employed draws
upon habits and objects well known to Indian readers
--various local fauna are described in minute detail
along with lillies, lotuses, jack-fruits, etc.--
giving the poetics of the work more immediacy,
intentionally less universality, than Vālmīki's ori-
ginal. Throughout, however, the author assumes that
the reader is familiar with the traditional story.
For, after all, Tulsīdās was working with materials
so well known that he could afford to compress, even
to omit, a number of components. Bharat's absence
from the kingdom is never explained; Kaikeyī's two
boons are mentioned but not detailed; Sītā's lengthy
request to accompany Rām to the forest is not
recorded (is she too young?), but only her satisfac-
tion in being permitted to accompany him is noted.

----

*"*Bāla-kāṇḍa*" C28, C119; "*Ayodhyā-kāṇḍa*" C194,
C217, C311,... etc.

Similarly, the ascetic's curse on Daśarath is passed
over quickly, with no elaboration; the dispatch of
Virādh is taken care of in a line or two; and
Śarabhaṅga becomes merely an encounter, not (as in
Vālmīki) a vital link in a chain of meetings leading
inevitably to Agastya and beyond. In the account of
the first meeting with Jaṭāyu, the "King of the
Vultures" is not even mentioned by name; Sītā's
"wounding words" to Lakshman, uttered after the deer
is killed, are omitted; and the episode with Kabandh
is given short shrift.   While Sugrīv sends out
parties, the expedition to the South is the only one
described, and in little detail at that; though
Sampati's wings evidently grow back, nothing is said
explicitly about them; Hanumān's ocean crossing is
barely described, and his recapitulation of the tale,
in order to introduce himself to Sītā in the Aśoka
Grove, is drastically shortened; etc. Yet, even
while such compressions and omissions do exist, there
are also extensions of existing story elements,
especially when those serve to emphasize some teach-
ing dear to the hearts of Tulsīdās' readers. For
example, Lakshman's farewell to his mother, Sumitrā;
Angad's interview as an envoy to Rāvan before the
battle begins; and numerous places in the "*Uttara-
kāṇḍa*" containing teachings about saints, sinners,
faith, devotion and so on are all elaborately
developed.

Most of the changes can be traced, ultimately,
to the ramifications of Tulsīdās' theological per-
spective. Given Rām's divine status it is no sur-
prise that Sītā is clearly, unambiguously identified
as an incarnation of Śrī. Consequently there is no
need for any other mystery about her, she is "born"
of known, earthly parents. Her identity with the
"Furrow" is muted. In addition, Rām and Sītā see

one another prior to their marriage and, recognizing
one another's eternal identities, fall in love at
first sight; Mantharā is inspired by the gods (viz.,
Sarasvatī), not by inherent evil, to set in motion the
"plot" because all creation is anxious for Rām to
enter the forest and to fulfill his divine task; the
motivations for Bhāradvāj's "entertainments" are
subtly different; Janak and his court come to see
Rām in the forest at the same time as Bharat, making
this a grand, courtly reception; Anasūyā merely
gives wifely advice to Sītā, since there is no longer
any need for protective amulets and mystery about
the great goddess; and it is not the "real" Sītā who
is abducted by Rāvan, but merely an illusory being
(see [23], pp. 311, 422); Rāvan's final sortie
engages nearly the entire cast of characters until
Rām appears in order to deliver the final coup de
grâce; etc. Finally, the ending itself is different:
since Sītā is not banished, the birth of the twins
Lava and Kuśa is only mentioned as a passing episode
during the long sway of Rām's rule.

Of course, not all the innovations originated
with Tulsīdās. That is where his dependence on
other sources enters the picture,[*] though this is not
the place to detail those. Whatever else may be
said of Tulsīdās' rendering of the Rāma-story, it is
undeniably set in a different time and place from
Vālmīki's strange and wonderful landscape. It is a
never-never land, an ecosphere in which gods and

---

[*]Most notably on the late 15th/early 16th cen-
tury *Adhyātma Rāmāyaṇa* (see [125] below), on the ear-
lier dramas *Hanumān-nāṭaka* and *Prasanna-rāghava* (see
[81] and [82], below, respectively), and on the 14th
century *Bhuśuṇḍi Rāmāyaṇa* ([124], below, and [127],
pp. 221*ff.*)

mortals coexist in a comfortable consciousness of one
another's presence. In addition, the whole narrative
is interlaced with a plenum of folk- and devotional
lore, and this last is but one of many clues to its
sustained popularity among the masses. It provides,
for example, many "whats, whys and whens": what to
do upon arriving at a pilgrimage place such as
Prayāg; why it is proper to repeat Rām's name after
sneezing; when it is important to undertake *japa* of
Holy Names, etc.

Tulsīdās lived to be 91 and the *Rāmacaritamānasa*,
though his masterpiece, was not his only work on the
Rāma-theme. Thanks to S.P. Bahadur's recently com-
pleted translation into English of Tulsīdās' complete
works, the interested reader may sample all of these.
Of most immediate interest, perhaps, is a song of
279 poems, most of which express in deeply devotional
exclamations of faith Tulsīdās' commitment to Rām.
This work is known as the *Vinaya Patrikā* (25 [II:3-
189]; also 32). Tulsīdās' *Kavitāvalī* (25 [V:1-97];
also 33), a work of his old age, is also important
for understanding his religious vision. The rapture
of the poet's ecstatic love for Rām is reflected in
the collection of 330 poems called *Gītāvalī* (25 [III:
39-248]), said to have been composed in Ayodhyā after
Tulsīdās' long sojourn in Chitrakuṭā. Of the minor
works attributed to Tulsīdās (25 [VI passim]), one
in particular demands attention here. There is some
controversy over the authorship of *Hanumān Chālīsā*
(25 [VI:165-168]; 34 [73-103]), which consists of
only 40 verses. It is worth mentioning here because
it dilates on the widely held folk belief that
Hanumān still lives somewhere in hiding; as such, it
represents but one of the many utterances of praise,
prayer, or petition addressed to the intercessory
monkey-figure, collections of which Rāma-related

materials are not otherwise noted in this biblio-
graphical survey.[*]

Before moving on to versions of the Rāma-theme
from other linguistic regions, it is important to
note another Hindi author who, like Tulsīdās, was
a Rāma devotee and who has often been overlooked due
to Tulsīdās' blinding aura. He is Keśava (var.,
Keśavadāsa), a younger contemporary of Tulsīdās but
one who, because of the latter's longevity, was out-
lived by the master poet, further casting him into
relative obscurity. Yet Keśava (1556-1618), a *brāhmaṇa*
of considerable sophistication and experience, was a
poet of refinement and sensitivity. He wrote
several works, but his not inconsiderable reputation
rests on a series of loosely connected poems in
Hindi based on incidents from the Rāma-story.
Although he was profoundly influenced by Tulsīdās,
his own poem, never to achieve the status accorded
Tulsīdās' chef-d'oeuvre, was quite different from it.
Such incidents as he borrowed from the story are
used primarily as vehicles to promote his own ideas
concerning various matters of interest to him--ideas
about kingship, government and statecraft; about
amorous women, infatuation and courtly love; about
beauty, vigor and old age; about nature, the seasons
and places. Yet the touch of the poet sparked his
verses with imaginative lustre, and to read parts of
the *Rāmacandrikā* even in translation (35) is to
glimpse an enchanting world of uncommon poetic power
and strikingly original embellishments. Most memor-
able, perhaps, are the verses containing the delight-
fully anachronistic description of Rāma and his
princely friends playing polo!

---

[*]See, however, page 122 and (148), below.

Kamban's *Irāmāvatāram* (Tamil)

Tamil is the language of some 37 million
speakers, mainly in the South Indian linguistic state
of Tamil Nadu. This is a scant 7 percent of India's
total population, so all that is said in the follow-
ing paragraphs must be placed in the context of the
minority language that Tamil is. Yet, Tamil presents
us with a literary heritage both rich and ancient
and, within Tamil literature, there are few works more
highly prized and justly praised than Kamban's [var.,
Kāmpar's] epic *Irāmāvatāram* ("The Descent of Rāma").
For many South Indians, it is "the" *Rāmāyaṇa*--though
that encomium is, to be sure, prompted more by
literary considerations than, as in the case of the
Hindi *Rāmacaritamānasa* by Tulsīdās, by faith in its
intrinsic, salvific power.

Kamban's* poem here under consideration is a
magnificent achievement. About twice the length of
Homer's *Iliad*, it contains six divisions (cf.
Vālmīki's seven *kāṇḍa*-divisions) which add up to a
total of 10,569 stanzas of four lines each. While
clearly patterned after the Vālmīki original, it also
bears close affinities to elements found in the
(later) *Adhyātma Rāmāyaṇa* (125). But it is far more
than a mere synthesis of its sources and, except for
certain exemplary *kāvya* pieces in Sanskrit, the Tamil
masterpiece is unparalleled in its use of the
resources of language to produce dictive effects and
to create evocative sound symbolisms. It is said
that Kamban, whose title *Kavicakravarti* means
"Emperor of Poets," perfected the *vṛitta*-meter in

---

*His date is debated; most probably he is to be
assigned either to the late 10th or early 12th century.

which he wrote. He is loved not only for his beauti-
ful imagery and dignified style but also for his
devotion to his subject.

In Kamban's *Irāmāvatāram* (also known as *Rāmā-
vatāra* or simply as the *Kamban Rāmāyaṇa*), Rāma is
unambiguously a divine being. Gone is the mystery
and ambiguity of Vālmīki's vision; here the dramatis
personae and the situations in which they find them-
selves are characterized by nobility of sentiment,
restraint in mood, and delicacy of utterance. Kamban
is separated from Vālmīki not merely by many centu-
ries but also by an inventory of tastes and conven-
tions drawn from a storehouse of Dravidian provision.
His articulation of Rāma's divine personality, of
Sītā's chastity, of Rāvaṇa's heroism, as well as his
delineation of such characters as Ahalyā, Vāli,
Kumbhakarṇa and Indrajit reflect Tamil paradigms,
follow Tamil literary traditions. Just as Vālmīki
included certain routine descriptions which later
became hallmarks of the Sanskritic *kāvya*-style, so
Kamban's descriptions of shores, mountains, forests,
deserts and habitations are structured by formal
considerations deriving from a different, Tamilian
heritage.

In keeping with his notion of Rāma's divinity,
Kamban ends his story with Rāma's triumphant return
to Ayodhyā after vanquishing Rāvaṇa. There is no
second fire ordeal for Sītā, no banishment for her
as in Vālmīki's version. Kamban does not draw at all
upon the narrative developments of the "*Uttara-
kāṇḍa*"--nothing must diminish the stature of the
evil-quelling God incarnate. In fact, Kamban adds
fresh material (e.g., the story of Iraṇiyan, or
Hiraṅyakaśipu, in Book VI) in order to reinforce the
image of Vishṇu as destroyer of demons.

The student unfamiliar with the literary conven-
tions that restrain yet enliven Kamban's telling of
the Rāma-epic will find at least three matters disen-
gaging in a first reading. One is the impact of
Sītā's stainless character; to a Western reader she
appears to have lost whatever might have been compel-
ling about her in the Vālmīki version: in Kamban she
is so much the model of virtue and fidelity that, at
least by contrast, she becomes uninteresting. Ano-
ther irksome matter will be the redundant and clichéd
imagery to which the poet apparently resorts without
hesitation, as well as the often far-fetched poetic
conceits in which he so extensively indulges himself.
Also perplexing is Kamban's evidently overworked con-
ceit of investing inanimate weapons with super-
natural powers, to the extent that those *astra*s
regularly battle one another in mid-air, and return
promptly to their dispatchers whenever victorious.
Especially in the final, war section the attention
given to the dispatch of these *astra*-weapons and
their prowess in combat becomes excessive. Against
these objections it must be argued, simply, that
"something gets lost in the translation" when Kamban's
classic is transposed into a foreign language and an
alien culture; it must be maintained that these are
some of the very conventions by which, mirabile dictu,
those familiar with Tamil literature measure Kamban's
greatness.

Although Kamban's *Rāmāyaṇa* has been translated
into other South Indian languages, notably Malayalam
(for which reason it is also popular in such places
as Kerala State), no complete translation into Eng-
lish has yet been undertaken. Best access to it for
readers of English can be gained through a severely
edited version, executed and translated by

V.S. Mudaliyar (36). It preserves the overall struc-
ture of Kamban's poem, and sympathetically samples
sections throughout the work so that the narrative
flow of the original model is sustained.

R.K. Narayan's version (37, 38) is not so easily
endorsed. In his own introduction, the South Indian
novelist quite disarmingly states that his retelling
"is by no means a translation nor a scholarly study,
but may be called a resultant literary product out of
the impact of Kamban on my mind as a writer." As a
narrative writer Narayan has taken "several contig-
uous sections of Kamban's work" and woven them into a
tale, interpolating his own analyses of Kamban's
motives or procedure at several points (e.g., pp. 3,
31, 33*f*., 97, 98, 113, 170*f*.), presumably to assist
the flow of the story. Gone, however, is the format
of Kamban's elaborately structured poem and, with it,
anything even remotely resembling Kamban's literary
style. In his epilogue, Narayan tries, for reasons
not made explicit, to link up his recital with the
Vālmīki version of the story--another jarring note!
All in all, then, Narayan's is a personalized recapi-
tulation of a 10th or 12th century epic by a 20th
century storyteller. On its own, it has much to
recommend it as a "fresh" version of the ever-beloved
Rāma-story; but it relates only accidentally to
either Kamban or Vālmīki.

Small bits and pieces of Kamban's *Rāmāyaṇa* have
from time to time been given over into English, the
most satisfactory among the partial translations
being that by C. Rajagopalachari (39), who unfortu-
nately presents only part of the *"Ayodhyā-kāṇḍa"*
section. The Kamban Society of Madras has promul-
gated a slim volume (40), but its 28-page length is
far too abbreviated for serious uses. Ponniah's pub-
lication (41), part of Kamban's creation reconstituted

as a play, can in no wise be recommended for a criti-
cal sampling of the Tamil poet. It is reported that
Professor George L. Hart III of the University of
California at Berkeley, in collaboration with
H. Heifetz, is at work on a translation of the
entirety of Kamban's *Forest Book*; it is likely to
be some years before that is ready to be put in the
hands of readers.

A few studies of Kamban give generous discussion
of his masterpiece, and may usefully supplement the
recommended reading by Mudaliyar. Two examples will
suffice: Maharajan's biography (42), which is brief
but pointed, and V.V.S. Aiyar's lectures (43), which
remain a classic study of the poet and his poem.
Several other studies compare and contrast the Kamban
Rāmāyaṇa with other versions--Vālmīki's, Raṅganātha's,
Tulsīdās'--and presume but little sophistication on
the part of the reader. These can, therefore, make
stimulating reading for the interested student.
S. Shankara Raju Naidu's dissertation (44) expands
upon some of the observations made in this, and in
the preceding section, of the present bibliographic
essay.

C.R. Sharma's study (45), based in part on
Kamban, brings into focus with it another,
popular (and consequently important) version of the
Rāmāyaṇa written in Telugu--another language of South
India, claiming some 45 million speakers, or roughly
8 percent of all Indians, concentrated in but not
confined to the geographical area known as Andhra
Pradesh. It is called the *Raṅganātha Rāmāyaṇa*, and
although attributed to a "Raṅganātha," it seems in
the main to have been the work of one Buddhā Reḍḍi,
albeit completed by his two sons after his death. Most
probably this work belongs to the late 13th century,
thus making this poetic rendering in 34,580 lines

one of the first 100 or more versifications of
the theme in Andhra, where Rāma has for so long been
reputed to be the favorite deity. That "work of
great simplicity and sweetness ... full of apt
similes" also forms the basis for regional puppet
plays and minstrel performances as well as for other
art forms. A translation of "Ranganātha's" work into
English was, in the early 1980s, reported to be near
completion in Denmark, fruits of a collaboration
between Niels R. Sorensen and A.R. Acharya (of Ahmed-
abad). Finally, S. Singaravelu's long essay (46)
helps to place the South Indian versions of the
Rāmāyaṇa within a meaningful context of cultural dif-
fusion as adaptations of Vālmīki's ancient epic
found expression beyond the subcontinent in reaches
of Greater India.

Krittivāsa's *Rāmāyaṇa* (Bengali)

     Bengali is a language known to about the same
number of native speakers as Telugu (some 48 million,
or about 8 percent of India's population, not to
mention the 90 million Bengali-speakers in what is
now called Bangladesh). Throughout the centuries,
Bengalis have made proud, outspoken claims for the
not inconsiderable heritage of their language.
Indeed, there is a palpable cultural presence which
pervades that corner of northeastern India where the
Bengali language and the Bengali mind predominate.
To a certain extent that cultural identity has to do
with a strong sense of place, that is, with an
attachment both mystical and chauvinistic to the land
they sense as their own, and with a religious imagi-
nation capable of perceiving the divine power in
terms compatible with a feminine theology. The

regional versions of the Rāma-story which circulate there reflect these, and other, features.

The regional version of the *Rāmāyaṇa* perhaps best known in Bengal is that by the late-14th century poet Kṛttibās Ojhā (better known outside Bengali-speaking regions as Kṛttivāsa). It is a work in six major sections plus a prologue and epilogue. The first section, "*Ayodhyā*," is an abridgement of the events of Rāma's birth, his education, marriage and exile (matters which Vālmīki distributed over two *kāṇḍa*s); the subsequent sections follow the names, though only in general terms the plot, of the original model. Battle scenes occupy about two-fifths of the piece. But what is most interesting about Kṛttivāsa's retelling of the Rāma-story are the local legends and modifications he introduces to the traditional narrative. For example, at one point the author describes Rāma engaging in Caṇḍīpūjā, and at another, describes one of Rāvaṇa's sons, Mahīrāvaṇa, worshipping according to local rules for tantric rites. Throughout Kṛttivāsa's work, sometimes called the *Bāṅglā Rāmāyaṇa*, a number of alterations lend it a special charm--no less so because of the author's repeated use of settings and locales familiar to Bengalis.

Kṛttivāsa also made a stunning change in his ending of the story. There Śatrughna is made to enter Vālmīki's hermitage because he is, at Rāma's command, following the horse set wandering as part of an elaborate horse-sacrifice undertaken by Rāma. Sītā, of course, is living at the hermitage although she is not much in evidence. Her twin sons, Lava and Kuśa, are more prominent; by this point in the story they are youthful warriors blessed with the possession of invincible weapons furnished by the super-sage Vālmīki. Lava and Kuśa kill Śatrughna forthwith.

In due time Lakshmaṇa and Bharata, seeking to avenge
Śatrughna's death, are also slain by the two boys,
all without Sītā's knowledge. Rāma, who comes with
his armies, challenges the two unknown youths. In the
ensuing battle, the two boys are protected not only
by Vālmīki's magic weapons but also by the power of a
truth-vow made by their mother on their behalf. In
the pitched battle between Rāma's forces and the
twins, all from Ayodhyā are killed; even Hanumān and
Jāmbavān, immortals who thus cannot die, are ren-
dered unconscious. After seventeen days of intense,
close combat with the boys, Rāma himself is slain!
The lads take his jewels and clothes as trophies and,
when Sītā sees these, all involved realize what dire
events have transpired.

Sītā and her two (now remorseful) sons prepare
to perform *satī* by constructing fire-pits for them-
selves. They are, however, dissuaded from this
course of action by Vālmīki, who brings everyone back
to life in a marvelous resurrection scene. Rāma,
recovered, returns to Ayodhyā still unaware of the
youths' identities. To culminate the interrupted
horse-sacrifice, Ayodhyā prepares for a great cele-
bration.* To this festive scene, Vālmīki dispatches
Lava and Kuśa to sing the "Rāmāyaṇa." After a month
of listening daily to the twins sing, Rāma is finally
moved to ask them who they are. Reconciliation
follows recognition, and Sītā is called for. But
she learns it is only so that she may stand trial
again. At this point her mother, Vasumatī ("Earth"),
rises up and gathers Sītā to her bosom, crying out to

---

*Up to this point, the alterations bear provo-
cative parallels to the *Kaśmīrī Rāmāyaṇa* (49; see
pages xliv-xlviii), described below on page 50*f*.

Rāma that she is rescuing her child. Together, Sītā
and Vasumatī descend into the earth.

In the epilogue, Rāma is described as inconsol-
able. He throws his powerful bow against the earth,
and Vasumatī makes another appearance, saying, "It is
not right for you to be enraged with me ..." (see
[47], p. 525). She orders him to listen to the
"Rāmāyaṇa" daily and Rāma does so for many years.
When in due time Death comes for him, Rāma receives
him gratefully and goes to his ascension site at the
River Sarayū, accompanied by all who have remained
close to him. The story by Kṛittivāsa ends as
Heaven rejoices to receive the thousands who accom-
pany Rāma (=Vishṇu) back to his celestial home.
There, along with his lovely consort Lakshmī, he once
more occupies his lotus throne.

A non-scholarly, but useful, translation of
Kṛittivāsa's Bengali *Rāmāyaṇa* is available (47).
Unfortunately several other Bengali retellings of the
story are not available in full translations,
although an interested student may turn to
Dineshchandra Sen's lectures *The Bengali Ramayanas*
(48) for abbreviated descriptions of their contents.
One of those which is particularly arresting is the
Mahī Rāvaṇer Pālā (ibid., pp. 252-283), essentially
a folk-telling of a popular Bengali legend, using
stock characters and events of the Rāma-story but
entirely different from it in spirit and intention.
The most notable element of it is the *Śākta* influence
which transforms Sītā into an avenging power who
finally kills Rāvaṇa herself (as also seen in the
Adbhuta Rāmāyaṇa, [129], below).

Divākara Prakāśa Bhaṭṭa's *Kāśmīrī Rāmāyaṇa* (Kashmiri)

Although current census figures show that only
a scant one-half of one percent of all Indians claim
Kashmiri as their native tongue, that minute figure
is out of all proportion to the considerable impact
Kashmiri culture has had on Indian civilization in
historical times. That northern region was an intel-
lectual center which contributed much to the develop-
ment of Buddhism, Śivaism, and Vishṇuism in the
subcontinent.

The appearance of the full-blown Rāma-story in
Kashmiri literature as early as the 11th century
(in Kshemendra's *Rāmāyaṇa-mañjarī*, as well as in his
Kanaka-Jānakī and his *Daśāvatāracaritam*) demonstrates
concretely that cultural exchange was mutual; indeed,
Vālmīki's story had early on become a part of
Kashmiri popular culture and folklore. That makes it
even more curious that the so-called *Kāśmīrī Rāmāyaṇa*
did not make its appearance until so late, in 1846.
It is a poem written by Divākara Prakāśa Bhaṭṭa, and
hence sometimes also referred to the *Prakāś Rāmāyaṇa*.
Although no full translation into English of this
late work exists, interested students may turn to
Sir George A. Grierson's detailed summary of it (49
[see pp. xxxii-l]).

Prakāśa's *Kāśmīrī Rāmāyaṇa* contains 87 chapters,
almost 1800 verses. Based on the earthly life of
the Prince of Ayodhyā, the poem adheres to the
general narrative line established by Vālmīki, but
features some significant changes of detail which
are pertinent--despite their late surfacing--to the
study of the evolving Rāma-theme in Indian literature.
In structural design it is divided into two major
sections. The first, called *Śrīrāmāvatāracarita*, con-
tains slightly more than 60 chapters comprising 1100

verses divided into 7 conventionally named *kāṇḍa*s.
The "*Bāla-kāṇḍa*" is made up of 7 chapters, comprising
143 verses, the opening 48 of which serve as a pro-
logue; the "*Ayodhyā-kāṇḍa*" contains 11 chapters com-
prising 167 verses; the "*Araṅya-kāṇḍa*" has 7 chapters
and 131 verses; while the "*Kishkindhā-kāṇḍa*" consists
of 1 long chapter of 68 verses, the "*Sundara-kāṇḍa*"
is made up of 12 chapters--263 verses--and contains
the legends of Rāvaṇa's birth which, in Vālmīki, had
been relegated to the "*Uttara-kāṇḍa*" of the original
Rāmāyaṇa. The "*Yuddha-kāṇḍa*" and its 17 chapters
comprise 320 verses, and a brief "*Uttara-kāṇḍa*" tell-
ing of Rāma's triumphal return to Ayodhyā has only
5 chapters and 39 verses. The second major section,
at 26 chapters and 627 verses, is nearly half again
as long as the *Śrīrāmāvatāracarita*. It is called
Lavakuśayuddhacarita, and contains some notable ele-
ments reminiscent of the Bengali *Rāmāyaṇa* by
Kṛittivāsa, reviewed above on pages 46-48.

In the *Kāśmīrī Rāmāyaṇa* as in other versions of
the story beyond India--e.g., the Khotanese, Tibetan
and Jaina versions--Sītā is the daughter of Rāvaṇa by
Mandodarī. In Rāvaṇa's absence, Mandodarī gives birth
to an infant but, upon learning that the child's
horoscope predicted that she would cause Rāvaṇa's
death, the mother ties a stone around the baby's neck
and casts her upon the waters. Sītā is miraculously
washed ashore, where she is found by King Janaka and
reared as his own child. Later on, as in the Bengali
and Jaina versions, and several circulating in South-
east Asia, the reason given for Sītā's banishment has
to do with a picture of Rāvaṇa she is tricked into
drawing by some evil female relatives, who use it as
evidence to arouse Rāma's jealousy. As for the
twins, Lava and Kuśa, Sītā gives birth only to Lava,
while Kuśa is conjured up by Vālmīki from a blade of

grass as the exact replica of Lava when he mistak-
enly thought that Sītā's child had been carried off
by beasts (a train of events not unlike those
rehearsed in Tibetan and Jaina versions of the
story). But it is the penultimate developments lead-
ing up to Sītā's descent into the earth where the
most remarkable changes occur, and where one most
readily recalls the parallels noted in the review,
above, of the Bengali version by Kṛittivāsa.

Vālmīki teaches the twins archery, as well as
giving them powerful *astra*-mantras to direct their
weapons unfailingly. One day their frolics are
interrupted by the arrival of a wandering horse
which Kuśa playfully mounts. Seeing his twin
brother abused by Bharata for this deed, Lava shoots
Bharata and kills him. In turn, Lava slays
Śatrughna. Lakshmaṇa then arrives, and he is killed
by the redoubtable twins. After this, Aṅgada,
Sugrīva, Jāmbavān, Hanumān, and even Rāma fall vic-
tim to their deadly weapons. Laughing, the boys
carry off the crowns of their eight victims, and skip
back with them to their mother. Sītā recognizes the
crowns, and determines to perform *satī* where Rāma
has fallen. Upon learning what has transpired,
Vālmīki, with Sītā's help, resurrects all of the
heroes. Thereupon, Sītā, in a sudden shift of feel-
ing, retreats once more to her cottage where she
remains unmoved by Rāma's petitions to return from
her banishment, and to accompany him and the twins
back to Ayodhyā. Upon Vālmīki's advice, Rāma goes
back to his capital with Lava and Kuśa and there
performs an *aśvamedha* horse-sacrifice. There, the
story returns to more conventional lines, and Sītā
is exonerated by her descent into the earth, after
which Rāma ascends into heaven.

Other Regional Versions Available in Synopsis Form

Three other regional variants of the Rāma-story must be noted in this section. None of them is available fully in English translation; all are at hand only as brief summaries in English. It must be stressed that not one of them is known to enjoy wide dissemination, either now or in its heyday. They remain curiosities, valuable mainly for what they reveal of the legend as it moved into different sectors of Indian culture.

The first (50) was discovered on a scroll in Chinese Turkestan. The reverse side of the scroll had earlier borne a Buddhist sūtra. The re-use of Buddhist scrolls, by that time considered wastepaper, dates the later writing on the obverse side--in the Tibetan language--at sometime between 700 and 900 A.D. Interestingly, the version of the Rāma-story on this palimpsest is not Buddhist-inspired; the document reflects Brahmanical sentiments. Although clearly based on the Vālmīki epic, the details of this Tibetan version differ from the original in the following ways:

a. The story opens with the narrative of Daśagrīva's origins.[*]

b. Sītā is born as the daughter of one of Daśagrīva's wives--the name Mandodarī is not specified--and the infant Sītā is abandoned, set adrift in a vessel, and then rescued and adopted by peasants; King Janaka is not mentioned.

c. Daśaratha has but two sons, Rāma and Lakshmaṇa, born through the medium of a flower rather than of food.

_____

[*] This name rather than Rāvaṇa is regularly used.

d.   Rāma voluntarily exiles himself while
Lakshmaṇa stays behind with the pair of royal clogs.

e.   Sītā marries Rāma, who gives up his ascetic
life and is crowned king.

f.   Śūrpaṇakhā appears at this point in the
story.

g.   Sītā is seized, along with a surrounding
plot of ground, * by Daśagrīva, who appeared to her
first as an elephant, then as a horse.

h.   Sugrīva wins his battle over Bāli [=Vālin]
with a mirror tied to his tail, rather than a gar-
land around his neck, and then takes three years to
come to Rāma's relief.

i.   Daśagrīva, not Indrajit, employs the
magical strategem of invisibility to vex his enemies.

j.   Daśagrīva is killed by an arrow of Rāma's,
which severs his horse-head--one of his ten heads--
and Sītā is thereupon liberated.

k.   Lava is born prior to Sītā's sojourn in the
forest, to which she freely goes in her search for
Rāma, who is long overdue from a battle. Kuśa, how-
ever, is created by *muni*s of the forest who mistak-
enly believe that Lava, who is temporarily lost, has
met an untimely death. Sītā is content with the
two similar sons.

l.   Sītā's later banishment is occasioned by
the words of a washerwoman; she and her two sons are
eventually recalled, and they all live happily in
the palace with Rāma thereafter.

---

* This detail predates its use by Kamban (see
[36], p. 135).

Another variant (51) originates in Khotan
[Hvatanai, now part of the People's Republic of
China]. It also contains elements found in other
northern recensions. Most pertinent to the develop-
ment of the theme as so far traced is the fact that
Sītā's birth is traced to the house of Rāvaṇa, as in
the Tibetan and Kashmiri variants. Numerous other
narrative points coincide with other northern ver-
sions while at the same time diverging from Vālmīki.
But it should be especially noted that, since this
is a Buddhist version of the tale, Rāma is none other
than the Buddha in a former birth, and at the end
Rāvaṇa is converted to Buddhism rather than killed.
Other interesting features include Paraśurāma's
role, which is different and accorded more signifi-
cant emphasis than in other versions; Sītā's role as
co-wife of Rāma and Lakshmaṇa; and Rāma's and
Lakshmaṇa's concealment of themselves beneath the
earth for twelve years. For another recasting of
the tale in Buddhist terms, see pp.   ., below.

A late, Sri Lankan variant (52), dating perhaps
from the 18th century, also derives from Buddhist
sources. In this Sinhalese folk-tradition, Sītā has
three sons, not twins as in the original story; one
is born naturally of Sītā, and the other two are
miraculously created by Vālmīki. Exploits that in
other versions are attributed to Hanumān are here
credited to Bāli [=Vālin], elevating him to a new
stature unknown in the original epic. As in the
Bengali, Kashmiri, Jaina and other versions of the
story dispersed in Southeast Asia, the motivation for
Sītā's banishment is a picture of Rāvaṇa she is asked
to draw by a female intimate, which picture arouses
Rāma's rage. Her three sons are reared in Vālmīki's

ashram during tne years of Sītā's abandonment by
Rāma, and at the age of seven they leave her to go to
Malaya country. There they set up three royal parks
and palaces, where they live thereafter. However
intriguing some of the details may be, it must be
stressed that this Sinhalese version, like the other
two just reviewed, is not widely known; it now sur-
vives in the Kandyan dancers' repertory, having
originally been a narrative accompaniment to a
ritual known as *Kohaṁbā Yakkama*. Much more instruc-
tive in regard to the diffusion of the ancient nar-
rative in a Sinhalese setting is a Sanskrit poem
called *Jānakīharaṇa* (see [93], below). This
Sanskrit work, composed in Ceylon, is a Hindu hand-
ling of the tale rather than a Buddhist recapitu-
lation.

DRAMATIC, POETIC, DIDACTIC AND
RELIGIOUS VARIATIONS ON THE THEME

The preceding section surveying regional
variants of the Rāma-story was taken out of chrono-
logical order because students new to the study of
the *Rāmāyaṇa* who accidentally encounter those later
compositions might easily, given their unfamiliarity
with the voluminous Rāma-literature, confuse them
with Vālmīki's ancient epic poem. But, in addition
to the regional variants, there are numerous other
forms the Rāma-theme has assumed: as dramas, as
more or less conventional *kāvya*-compositions, and as
didactic, religious tracts articulating partisan
perspectives.

Ask any educated Hindu knowledgeable in
Sanskrit for a rendering of the Rāma-theme other
than Vālmīki's, and the first response is likely to
be Kālidāsa, or Bhavabhūti, or the "*Adhyātma*," with
no mention of Tulsīdās or Kamban or of other
regional variants, no matter how popular those may
be with the (local) masses. The earliest of the
works now under review precedes the first of the
regional variants by many centuries. And, predating
even these are recapitulations of the tale in
Buddhist *Jātaka*s as well as in Jaina transformations
of the story. But those will be taken up in the
section following this present, tripartite one.

The tales of twisted destinies, separated lovers, suffering nobility, and daring anti-heroes in the Rāma-story are a natural source of inspiration for dramatists. Since audiences are already familiar with the "plot" and attuned to its emotional resonances, any play based on the Rāma-theme--or even any part of it--provides for the playwright and spectators alike a ready store of episodes to be recalled, reviewed, remembered, and an ample reserve of sentiments to be evoked, stimulated, savored. The theatre literature of the Hindus is rich and

varied fare; Rāma-drama represents a respectable
repertory within it. In these as in other "Sanskrit"
dramas, Prakrit is used for the comic roles and by
the actors depicting most women's roles, while the
Sanskrit lines are reserved for the male characters
of heroic mold (viz., Rāma, Lakshmaṇa, Daśaratha,
Viśvāmitra, et al.).

    One of the earliest dramatists whose "Sanskrit"
plays may be read in English translations is the
fourth century Bhāsa who is believed to have come
from the western coastlands of South India. His
ancient plays are still used, at least in part, as
standard elements of modern dance dramas in coastal
Kerala and Karnataka states. Two of his plays are
based on the Rāma-theme, and both are available in
full English translations. One, called *Abhiṣeka-
nāṭaka* ("The Consecration") deals in six acts with
the events of the "*Kishkindhā-*," "*Sundara-*," and
"*Yuddha-*" *kāṇḍa*s of the original epic, and culminates
with the triumph of the hero at his coronation scene
(53, 54). As with Bhāsa's other plays the characters
in it--most especially the men--are strongly deline-
ated, the action bold and clear. The other Bhāsa
play, *Pratimā-nāṭaka* ("The Statue"), extends to seven
acts depicting selected episodes from the "*Ayodhyā-*"
and "*Araṇya-*" *kāṇḍa*s, with the addition of a brief
reunion with Sītā and other family members, followed
by the preparation of all to return to Ayodhyā
(55, 56, 57, 58, 59, 60). In it one sees a striking
example of how the ancient master playwright ignored
at least one cardinal rule of Indian dramaturgy:
in Act II the ancient king, Daśaratha, after lament-
ing for his exiled son Rāma, dies onstage. The two
Bhāsa plays relate to one another only in that they
both draw upon familiar incidents of the epic for
their inspiration, and both serve in different ways

to soften several of the traits which in the original
epic had blemished the characters of the leading
personalities. Indeed, it is these new nuances of
portrayal which have time and again roused the admir-
ation of those watching the performances, both ori-
ginally and throughout the centuries to recent times.

Another early play, dating from the sixth cen-
tury, affords clues that the author, even then, was
among those who viewed Rāma not as a mere mortal but
as an *avatāra* of Vishṇu. This holds importance for
students wishing to trace the history of an idea, the
conception of which remains so mysteriously ambiguous
in Vālmīki's original. This is the play by Dhīranāga
[var., Diṅnāga] known as *Kundamālā* ("The Jasmine
Garland"), available in two full English versions
(61, 62). It covers a ten-year period in its six
acts: the opening scene commences with Sītā's aban-
donment by Lakshmaṇa, while the closing acts ends
with the happy reunion of Sītā and Rāma after Kuśa
and Lava have recited the story, and after the Earth
has risen to vindicate Sītā's chastity. Much of what
constitutes the middle part of the 18-character play,
however, is the invention of Dhīranāga, which critics
take as proof not only of his inspiration from
Vālmīki but also of his independence from his source.
In that central portion there are scenes in which the
sage Vālmīki instructs the youthful Kuśa and Lava in
the story and its recitation; and there is an affect-
ing encounter between Rāma and Sītā in the forest.
It is believed that some of these elements original
with Dhīranāga were later borrowed by Bhavabhūti
(see below). Indeed, the work often elicits favor-
able comparison with both Bhavabhūti and with
Kālidāsa.

Bhavabhūti (fl. 730) is second only to India's
universally acknowledged reigning playwright

and supreme poet, Kālidāsa, whose use of the
classical Sanskrit language is unsurpassed. While
Bhavabhūti's plots are said to be superior, this is
difficult to demonstrate here, for Kālidāsa has no
play based on the Rāma-theme[*] to compare to
Bhavabhūti's two plays celebrating Rāma, which are
treasures within India's bountiful theatrical liter-
ature. The earlier of the two, the *Mahāvīracarita*
("The Tale of the Great Hero"), deals with that part
of Rāma's life from shortly after his marriage up to
his coronation; in this treatment Rāma's divinity is
clearly assumed. Complete translations of the seven-
act play are available, though difficult to obtain
(63, 64); a summary is available in one of the stan-
dard editions of the author's other play (65), while
short descriptions of the piece are available in two
widely used studies of Sanskrit drama (see [66],
pp. 98-105, and [67], pp. 188-190, 193-195). The
later of these two dramas, called *Uttararāmacarita*
("Rāma's Later History"), has stimulated many trans-
lators to render it into English (68, 69, 70, 71,
72, 73, 74, 75). In this seven-act play the action
commences just before the abandonment of the preg-
nant Sītā, and moves to a happy reunion of Rāma and
Sītā, Kuśa and Lava. A reversal of the original
epic takes place in this drama, wherein the Earth
personified presents her purified daughter, Sītā,
to the noble Rāma, rather than disappearing forever
into the depths with Sītā. Bhavabhūti's later play,
incorporating many of the elements of the "*Uttara-
kāṇḍa*" so often ignored even today, never abandons
the author's stance of affirming Rāma's divinity;

---

[*] See, however, (85) through (89), below.

still, in this composition, he seems to emphasize
the royal hero's human characteristics more than in
the earlier *Mahāvīracarita*.

Yet another Southern writer, Śaktibhadra, who
is said to have been a 9th century Nambūdiri *brāhmaṇa*
from the Kerala or Malabār coastal area, wrote on
the Rāma-theme for the theater. His seven-act play
(76, 77), which is still very popular among actors of
Malabār, starts with Śūrpanakhā's encounter with
Lakshmaṇa, and moves through Sītā's abduction,
restoration, fire ordeal, and reconciliation with
Rāma. As its title suggests, in *Āścarya-cūḍāmaṇī*
("The Wonderful Crest Jewel"), a dramatic signifi-
cance is placed on the decorative forehead ornament
that Sītā is wearing when abducted, and that she
later gives to Hanumān for Rāma, in token of having
received his message of the ring. In many ways, this
is one of the more immediately satisfying plays on
the Rāma-theme available to readers of English.

A brief description and discussion of a play
called *Bālarāmāyaṇa* is contained in Keith (67 [pp.
232-234]), but only five of the play's ten massive
acts are available in English translation. Written
by the early 10th century dramatist Rājaśekhara, from
the area now known as Maharashtra, its dominating
features include the love with which Rāvaṇa is
smitten for Sītā.

Among those plays currently available in trans-
lation, another must be noted here. This later,
17th century work seems to hail from a time when all
of the freshness and most of the creative vigor had
abandoned the genre, and it is not a good piece to
read when one is new to Rāma-drama. It is the seven-
act play *Jānakīpariṇaya* ("The Marriage of Jānakī
[or, Sītā]") by Rāmabhadra Dikshitār [alias,
Cokkanātha] (79). The production, as it was staged,

took several liberties with the sequence of episodes in the original epic exposition--Daśagrīva (Rāvaṇa) is introduced early as a frustrated contestant for Sītā's hand--though in general terms, the action covers the period from the contest for Sītā's hand to her return from captivity, including the consequent arrangements in Ayodhyā for the return of the reunited Rāma and Sītā. In its unfolding, the drama makes much use of *rakshasa*s' ability to take on other identities, and for other characters to assume disguises, resulting in confusion of characters by those engaged in the action. The audience is kept informed by many asides from the actors; the device of having characters onstage who are invisible to other characters is tediously overused; and the playwright resorts several times to describing crucial action taking place offstage, out of sight. Act VI consists almost entirely of a play-within-a-play, which is a conventional (though scarcely convincing) solution for recapitulating events which have already transpired dramatically. The cast requires more than forty players. Altogether this is an unsatisfying work, far inferior to those of Bhavabhūti, Bhāsa, and Śaktibhadra.

Before leaving this brief survey of Rāma-drama, it is useful to mention half-a-dozen plays which may serve to supplement the serious student's review of Indian plays based on the Rāma-theme. Two of the six have been laboriously reconstructed by use of passages quoted from them in other works and in anthologies, since their originals have been lost during the centuries. Another is one that has been recently translated but not as yet (1983) published. Still another, translated in the first half of the 19th century, is rare and extremely difficult to locate. Yet another is known to have been translated

but has not been located despite searching; the last
is available only as a brief synopsis for non-
Sanskrit readers.

The reconstructed plays make interesting study
for those who love a mystery, or who admire an
astute detective alert to clues·and who thus can
celebrate a good unraveling of a tale. For them,
V. Raghavan's book, *Some Old Lost Rāma Plays* (80),
is recommended. The late polymath describes in it
(pp. 1-25, especially 11*ff.*) what the lost six-act
play *Rāmābhyudaya* ("Waxing Rāma"?) must have been
like. This play, written by the late 8th century
king, Yaśovarman, begins with the emergence of the
exiles in the Pañchavaṭī Glade ("*Aranya-kāṇḍa*") in
Raghavan's restoration, and ends with Rāma's corona-
tion after the battle ("*Yuddha-kāṇḍa*"). Later in the
book (pp. 26-49, especially 32*ff.*), Raghavan culls
widely dispersed quotations and excerpts in subse-
quent literature to reconstruct the play *Kṛtyā-
rāvaṇa* ("The Deeds of Rāvaṇa"). Written by an
unknown author who flourished before the mid-9th
century, the play's date is uncertain as well.

The translated but as yet unpublished work is a
Rāma-drama which was once more popular than either
Bhavabhūti's or Kālidāsa's plays. Murāri's late-
10th century *Anargha-rāghava* ("Priceless Rāghava
[Rāma]), is sometimes referred to as *Murāri-nāṭaka*.
While this work has been described by both Wilson
(66 [pp. 130-137; orig., II:375-383]) and Keith
(67 [pp. 226-231]), J.P. Losty of the British
Library had not quite completed the revisions to his
translation as of (late) 1982. Among the many note-
worthy attributes of the play is the fact that it
makes quite clear (in Act VII) that Rāvaṇa's Laṅkā
is not the same as Siṁhala, or modern-day Sri Lanka
(Ceylon).

Among those plays which in translation are so
difficult to locate as to be virtually nonexistent
is the nine-act play appropriately named *Mahānāṭaka*
("Great Drama") (81). This longish drama comprises
24 scenes, and requires a large cast. The action
covers the events from Rāma's contest for Sītā's
hand all the way through his victorious return from
Laṅkā to Ayodhyā with his rescued wife. A tradition
associated with this work holds that it was origi-
nally written by Hanumān prior to Vālmīki's time--
hence it is sometimes referred to as *Hanumān-nāṭaka*
--and then hidden by Vālmīki, jealous because its
style outshone his own. In fact, it comes down from
about the 11th century in two recensions, and may or
may not be traceable to pre-existing fragments of an
earlier Hanumān tradition. In either event, what is
now seen "plagiarizes shamelessly" (67 [p. 271]),
according to Keith, who notes that it contains whole
lines from Kālidāsa and Bhavabhūti as well as situa-
tions lifted from other works. These are not easily
spotted in a translation. This same play is said to
be among the sources which heavily influenced
Tulasīdāsa. For students using this bibliography as a
reading guide, the *Mahānāṭaka* will be remembered as
a play which handles large blocks of the Rāma-story
with extraordinary economy. For those unable to
procure a copy of the now-rare 1840 translation by
K.K. Bahadur, Adolf Esteller did a German transla-
tion in 1937 (reprinted in 1966), and Wilson also
provides a résumé (66 [pp. 122-130; orig., II:363-
373]).

Another translation that is very difficult to
find is *Prasanna-rāghava* ("The Tranquil Rāghava"
[Rāma]") by the 16th century logician Jayadeva. Sir
Ganganatha Jha reportedly translated this play under
an Allahabad imprint in 1906, but the compiler of

the present bibliography has not seen it, and the
report of its existence may have confused a commen-
tary in Sanskrit which Sir G.N. Jha wrote based on
the play,[*] for the supposed translation. Verifica-
tion of the translation could not be made before
press time. Meanwhile, students must make do with
the meager information about the play found in
English elsewhere (82). This seven-act drama spans
the life of Rāma from his wedding to Sītā until his
final victory over Rāvaṇa. While it has never earned
high praise as a dramatic work, W.D.P. Hill (23 [p.
xvi]) states that Tulasīdāsa "appears to have been
specially influenced by ... " this work, too. It is
briefly described in Keith (67 [pp. 244-246]), who
reports that in its opening act, both Rāvaṇa and the
Āsura Bāṇa are contestants for Sītā's hand but fail
to break Śiva's bow. Students perusing library card
catalogues should be forewarned that this Jayadeva
is not the same Jayadeva of *Gītā-govinda* fame.

The final play to note is the mid-18th century
drama by Rāmapaṇivāda, *Sītā-rāghava* (83), a seven-act
play for which only a brief--though useful--synopsis
in English currently exists.

Before moving on, it should be noted that from
time to time classes advance original dramatizations
based on the Rāma-story. These formidable projects
are no doubt instructive exercises for the energetic
individuals involved; however, in part because they
are amateur theatricals, such presentations inevi-
tably result in lamentable occasions. The reasons
probably have more to do with the scripts used than

Medical Hall Press, 1906).

with the companies' histrionic limitations. Those
who are looking for vehicles to stage as a collateral
learning activity to a study of the *Rāmāyaṇa* might
be better served were they to look at some of the
ancient Rāma-dramas in translation. Judiciously
edited to suit the tastes of contemporary Westerners,
one of the classical Sanskrit plays already trans-
lated--for example, Śaktibhadra's *Āścarya-cūḍāmaṇi*
(76, 77)--might be effectively staged before appre-
ciative Indo-American and North American audiences.

One of the most impressive directions toward which the creative genius of Indian writers expanded was in the development of increasingly sophisticated *kāvya*-type poetic works. Recall that Vālmīki is often referred to as the first/premier/foremost poet [*ādikavi*] by virtue of the *śloka*-verse he reputedly invented and which he used to such advantage in the *Rāmāyaṇa*. That composition is often referred to as the first/premier/foremost poem [*ādikāvya*] by virtue of the structure, scope, contents, sentiments and embellishments it displays. Subsequent *kāvya*-writers, seeking to emulate the master's model, likened the necessary, constituent elements of a *kāvya*-work of poetic composition to the intricate, composite nature of a human individual: a complex living being comprises a physical body to which are conjoined characterizing differentiations--personality traits, various outward delineations such as attire and adornment, and several compelling inner

drives, motives and intentions. So too is a poetic
work a happy combination of basic, conventional
sounds, or words [*śabda*], to which are fused subtle-
ties of meaning [*artha*]--qualifications of tone and
emphasis, poetic embellishments of style and imagery,
and evocation of suggestive sentiments and reso-
nances and import. The developing *kāvya* tradition
witnessed the production of works which emphasized
now one, now another of those constituent elements.
By and large the convention which emerged was that,
in order for a *kāvya*-composition to qualify as a
conspicuous [*mahā-*] example of the genre, it had
not merely to attain an approximate bulk (most often
20 cantos, more or less), but had moreover to mani-
fest a set inventory of figures of speech, formal
descriptions, and tonal priorities.

But the outstanding examples among early *kāvya*
works, including the so-called "*mahākāvya*" pieces,
were marked by an admirable simplicity: long, com-
pound words were eschewed though they were later to
come into vogue, and the explicit diction employed
availed itself of no vagueness or ambiguity whatso-
ever. Specific Sanskrit meters (viz., *Śakvarī*, *Ati-
Jagatī*, *Ati-Śakvarī*, *Triṣṭubh*, and *Puṣpitāgrā*) were
enjoined to assist the poet to evoke noble responses
in his readers, to arouse the several emotions which
this and other, related forms of compositions sought
to cultivate. In addition, the narrative so told
generally adhered to the career of a hero, or to
the exploits of several exalted personalities, real
or imaginary, and was set forth in a work divided
into several discrete sections, each telling in some
detail an incident from the larger story. Vālmīki's
master model had described a royal hero in banish-
ment as well as in ruling authority; moreover his

narrative included descriptions of assemblies,
sending of emissaries of state, the marches of sol-
diers with diverse regalia and weaponry, the full
array of battle in addition to descriptions of peace-
ful hermitages, sending of messages of love, wan-
derings through graphically delineated forests and
mountains, and endurance of the dislocation caused
by separation from loved ones. Imitative epic poems
in the subsequent *kāvya*-tradition also employed
these as stock items. Prominent features also
included descriptions of cities, oceans, rivers, the
sun, the moon, the seasons, drinking festivities,
gardens, water sports, the birth of a son, and edu-
cational and competitive functions (see also [84],
passim). A convention requiring all of these con-
stituents developed early on.

The convention produced not only masterpieces
but also, in due time, excessive and strained arti-
fices. In the latter case, authors contrived to
experiment artfully with the inherent flexibilities
of the Sanskrit (or, in some cases, the Prakrit) lan-
guage in which the poems were composed. Compound
words became longer, more complex and allusive.
Double entendre, a device technically referred to as
ślesha, introduced an intentional ambiguity in the
reading of a text; this was later to become a leit-
motif of what many critics consider to be a degen-
erate development in the highly cultivated composi-
tions. Descriptions became increasingly more
labored and extended, and imagery became self-
conscious and strained, more than occasionally impro-
bable.

Yet some tours de force of the developing *kāvya*-
genre, including "*mahākāvya*-" compositions, were
impressive creations, indeed. Maximizing the

potentials of the *ślesha*-device, a number of
authors in this remarkable poetic tradition succeeded
in contriving works which, when construed at one
level, told one story and, when construed at another
level, explicated quite another topic. Or, in dis-
plays of lexigraphic virtuosity rarely matched else-
where in world literature, some sophisticated
specialists in the genre devised pieces which, when
read forward, narrated one matter and, when read
backward, yielded another opus altogether.

The Rāma-story was, of course, only one of the
many subjects to which *kāvya* and "*mahākāvya*" writers,
both early and late, turned for inspiration. Only
some of the compositions in the genre based on the
Rāma-theme are available in English translations.
Yet even the limited number available in translation
lend some substance to the foregoing generalizations
for students who cannot turn directly to the Sanskrit
originals. As was the case with dramatists' use of
the Rāma-story, the *kāvya*-composers rarely dealt
with the entire epic; more often a *kāvya*-piece,
whether long or short, elaborated on some selected
section within the larger story. Confident that the
framework was already well known, the artful authors
presupposed their cultured readers would supply the
context.

Kālidāsa has already been mentioned, in the
preceding section on Rāma-drama, as India's univer-
sally acknowledged, reigning playwright and supreme
poet. Although he did not base any of his plays on
the Rāma-theme, one of Kālidāsa's poems--which is
regarded as an outstanding landmark in the wide-
ranging vista of India's poetic literature--is based
on it. This is the *Raghuvaṁśa* ("The Dynasty of the
Descendents of Raghu, Progenitor of Rāma"), a

"*mahākāvya*"- piece in Sanskrit containing 19 cantos.
This relatively short work may be taken as an epi-
tome of the "*mahākāvya*" tradition. Conceived of in
grand dimensions, it deals with Rāma's ancestors in
Cantos I-IX; his life in the middle six cantos,
X-XV; and his descendants to the twenty-fourth gen-
eration in Cantos XVI-XIX. The beauty of its
descriptions and the chaste quality of its style--
for which reasons it is hailed as Kālidāsa's finest
work--have inspired many translators to try their
hands at rendering the *Raghuvaṁśa* adequately into
the English idiom. Consequently, many libraries may
offer interested readers more than one version of
the several which are generally available (85, 86,
87, 88, 89).

Different scholars have placed Kālidāsa at
various dates within the span of the fourth to the
seventh centuries. Most recent considerations would
place him in the fourth or fifth centuries, which
makes two data found in his *Raghuvaṁśa* all the
more interesting. The first is the fact that, in
his telling of the legend, he seems familiar with
narrative elements belonging to the supposedly later
"*Uttara-kāṇḍa*," namely the abandonment of Sītā, the
episodes featuring Lavaṇa and Śambūka, the birth of
the twins Lava and Kuśa, Lakshmana's death, and
Rāma's ascension. Clearly these elements were known
to him as well as to his readers. As noted later in
this bibliography (see page 111, below), the Jainas
were willing to deal with the events also found in
Vālmīki's "*Uttara-kāṇḍa*" from at least the third
century C.E. The subsequent, repeated omission of
those matters by later authors may have been due
more to voluntary suppression than to ignorance--a
situation not unlike that which prevails today among
those who, for various reasons, opt to omit the

events of the epic that follow Rāma's triumphant
return to Ayodhyā (e.g., [9], [10], and [17]). The
second item to notice is a minor detail he introduces
in verse 2 of Canto XII, a nice touch which, after
its imprimatur by Tulsīdās' adoption of it and its
later repetition by others, has since placed an
indelible stamp on the popular imagination. This is
the fact that King Daśaratha's discovery that his
hair is turning gray is what persuades him to abdi-
cate in favor of his son, Rāma. This detail has
continued to be a narrative staple for artists illus-
trating the Rāma-story even into recent decades.

Another "*mahākāvya*"-work of great repute that
is available in English translation comes from an
original in Prakrit, that is to say, from one of the
several vernaculars derived from Sanskrit. This com-
position is referred to alternatively as the
Setubandha ("Construction of the Causeway"), the
Rāvaṇavaha ("Regicide of Rāvaṇa"), or the *Rāmasetu*
("Bridge for Rāma") (90). Not surprisingly, given
two of the titles, this poem places special emphasis
on the building of the great causeway [*setu*] between
the mainland and the island kingdom of Laṅkā (VI:20-
96; VII:1-71; VIII:1-97). King Pravarasena (fl. 575),
the author of the 15-canto poem, concentrates his
narrative treatment on the events generally associa-
ted with Vālmīki's "*Yuddha-kāṇda*," for he covers
events roughly from Hanumān's return from Laṅkā with
tidings of Sītā's condition, to the death of Rāvaṇa
followed by the recovery of Sītā. Throughout,
Pravarasena introduces conventional descriptions
standard to the *kāvya*-genre, which features have,
through the centuries, won him high praise from Hindu
textual connoisseurs. In the development of the
"*mahākāvya*"-epic poem, Pravarasena's *Setubandha* in
Prakrit represents a phase where descriptive passages

have become extended to the degree that they measure
nearly twice the bulk of the strictly narrative sec-
tions of the piece. The full translation of the work
which has recently become available (ibid.) makes
resort to résumés less out of necessity than was
heretofore the case (91; also 84 [pp. 210-228]).

The work most popularly known as the *Bhaṭṭikāvya*
(92) is an influential *kāvya*-composition. Written
sometime in the 6th or 7th centuries, in due time it
provided not only the inspiration but also the model
for one Yogīśvara (late 10th century), whose adapta-
tion of the Rāma-story into Javanese was destined to
determine to a large extent how the epic was trans-
mitted beyond India in Southeast Asia. But that is
quite another subject for study. The piece here
under consideration tells in 22 brief cantos the
bulk of the epic--minus the events of the "*Uttara-
kāṇḍa*"--from Daśaratha's original ritual to beget
progeny (Canto I) to Rāma's return from banishment
and his own performance of a victorious horse sacri-
fice (Canto XXII). In its narration a few details
are slightly altered--Janaka is a hermit, not a king;
Kaikeyī has no servant, no boons; Daśaratha himself,
not his wife, orders Rāma into exile; Śurpaṇakhā
insinuates herself upon Lakshmaṇa before turning her
attentions to Rāma; etc.--but they are for the most
part minor changes. What is much more remarkable
about this piece, sometimes also called the *Rāvaṇa-
vadha* ("The Killing of Rāvaṇa"), is that its author
Bhaṭṭi (alias, Śrībhaṭṭa) creates in it an exemplar
of the increasingly artificial *kāvya*-style as it
moves toward ever more fulsome exploitation of the
ślesha potential of double entendre. For, while the
story is being narrated, its words may be construed
at another level of meaning so that the poem simul-
taneously outlines in proper sequence the rules of

Sanskrit grammar and poetics (cf. [102], below). To
be sure, it is not feasible in an English rendering
to do justice to the dual thrust or to the elegance
of the original. The closing decades of the last
century witnessed three efforts by Indian translators
to deal with the opening few cantos. But a more
recent translation by G.G. Leonardi, who provides
notes as well, renders the entire poem at its narra-
tive level (92), and interested students should turn
to this version.

An admirable example of the conspicuous effort
to create a composition of the "*mahākāvya*" genre can
be seen in the poem called *Jānakī-haraṇa* ("The Abduc-
tion of Sītā"). This impressive work was composed
in Sri Lanka (then Ceylon) during the latter half of
the 7th century, and focuses on the ever-popular
abduction subtheme of the ancient epic. Its author,
Kumāradāsa (alias, Kumāradatta or Nāthakumāra), was
evidently influenced both in expression and exposi-
tion by Kālidāsa, traditionally viewed as his contem-
porary. Kumāradāsa's poem is, however, considerably
longer than the *Rāghuvaṁśa*, as seems consistent
with the genre-requirements, which by that time
required the inclusion of a number of set elements.
Only a scant one-quarter of *Jānakī-haraṇa*--the con-
cluding five cantos--is available in English transla-
tion (93). Here the poet recounts what transpires
from the point where Rāma and Rāvaṇa engage in pre-
liminary skirmishes prior to their grand battle, up
to and culminating with the final coronation of Rāma
with Sītā. To supplement this partial translation,
interested students should turn to a useful précis of
the complete work (94), which also includes an analy-
sis of the number of *śloka*s in each canto given over
to various topics. The problems still remain as to
the identity and precise dating of Kumāradāsa, and

they are discussed briefly elsewhere by Godakumbura
(95; cf. "Introduction," 94).

Probably the best example through which non-
Sanskrit readers may glimpse something of the *kāvya*-
style at a stage of its advanced, conspicuous devel-
opment, when it makes maximum use of *ślesha*, is in
Radhagovinda Basak's translation of Sandhyākara-
nandin's *Rāmacaritam* ("The Chronicle of Rāma") (96).
Sandhyākaranandin was a 12th century author in Bengal
who simultaneously told the bare elements of the
Rāma-story and eulogized the career of his own king,
Rāmapada of Bengal and Bihar. His work is not long.
Its four books contain in total[*] only some 220
verses, including an appended "*kavipraśasti*" which
tells who the poet was. Its brevity illustrates the
principle of radical selection of narrative elements
from a known story so often found in *kāvya*-works.
The English rendering by Basak (pp. 1-104) translates
each *śloka* twice, version "A" telling the story of
Rāma as traditionally transmitted, version "B" yield-
ing the narrative of the exploits of the monarch con-
temporary with the poet. In addition, the translator
provides 80 additional pages of explanatory notes
coded to each of the 220 verses; these assist the
English reader with the subtleties of syntactic,
lexicographic, and contextual considerations perti-
nent to the text, which is technically illustrative
of the "*dvisandhāna*," or "two-in-one" style of *kāvya*-
writing.

One more *kāvya*-type poem based on the Rāma-
story, and available in full in English translation,

---

[*]Book I, 50 *śloka*s; Book II, 49 *śloka*s; Book III,
48 *śloka*s; Book IV, 48 *śloka*s; the *kavipraśasti*, 20
*śloka*s.

illustrates yet another facet of the highly stylized
tradition. This is a 14th century poetic conceit
written in imitation of an earlier masterpiece by
the venerable Kālidāsa. In his famous *Meghadūta*
("Cloud Messenger"), the earlier writer had described
a cloud passing over various landmarks in the north-
ern ranges of India to deliver a lover's message to
his lady. Kālidāsa's much-admired work extended to
only 110 stanzas, as did the later imitation by the
medieval poet-theologian of the South, Vedānta
Deśika. His poem, *Haṃsasaṃdeśa* ("Swan Messenger"),
likewise draws upon the conceit of a high-flying
courier. In *Haṃsasaṃdeśa* (97, 98), Rāma charges a
gander with carrying a message from Pampā to his
beloved Sītā, held captive in Laṅkā by Rāvaṇa. The
winged messenger's flight southward gives the poet
an opportunity to describe landmarks along the way;
thus in this work of South Indian origin one finds
descriptions of such well-known regional centers as
Tirupati, Kālahasti, Kāñcīpuram, and Śrīraṅgam. The
two works taken together--Kālidāsa's *Meghadūta* and
Vedānta Deśika's *Haṃsasaṃdeśa*--are thus jointly
praised as complementing one another, although only
the latter draws upon the Rāma-theme.

A few additional *kāvya*-works based on the Rāma-
theme may be known to readers of English through
brief résumés only. The short outlines available
serve to give but the gists of the narrative treat-
ments, nothing of the substance or style of the
respective pieces. Thus, while the following refer-
ences are of limited use to most students, they may
yet serve to introduce the interested reader to the
existence of the works. The compositions so treated
are four in number, one of which is Abhinanda's
Rāmacarita ("The Story of Rāma") (99), a late 9th
century "*mahākāvya*" creation in 36 cantos. The poem

enlarges upon those events described by Vālmīki in
the latter parts of the "*Kishkindhā-kāṇḍa*" through
the "*Sundara-kāṇḍa*" to the end of the "*Yuddha-kāṇḍa*,"
in the course of the retelling altering several
accounts, and subtly changing the traits of certain
characters. The poem became quite popular, making
Abhinanda famous in his own lifetime; in subsequent
centuries it was mentioned, quoted, and imitated in
many other works, and so this work, composed in Ben-
gal, is a noteworthy *kāvya*-variant of the Rāma-story.
The second and third compositions, both late, are
important for their inclusion of events following
Rāma's coronation, that is, those materials narrated
in the "*Uttara-kāṇḍa*" of Vālmīki's original *kāvya*-
model, but so often omitted in the recasting of the
story (as in the just-mentioned work by Abhinanda
[99], and in the equally influential *Bhaṭṭikāvyam*
[92] and the *Jānakīharana* [93]). The anonymously
written *Uttara-rāma-carita* ("The Later History of
Rāma") (100) appeared in Kerala sometime in the 17th
or 18th centuries. In 5 cantos, it deals with the
rule of Rāma in Ayodhyā, the birth of his twin sons
during Sītā's banishment, and their final reconcilia-
tion with Rāma before his ascension. The 18th cen-
tury *Śrīharicarita-mahākāvya* ("The Epic of the
Blessed Lord") (101) includes the later, post-
coronation events as part of its narration of the
entire story in 16 cantos. The fourth of the *kāvya*-
compositions, albeit not itself available in transla-
tion, may be sampled through a brief, technical
introduction to the poem in English (102 [pp. 1-30]).
This work is called *Rāghavīya* ("Concerning Rāma"),
and it was written by the Kerala poet Rāmapāṇivāda
who was mentioned in the section on Rāma-drama
(cf. [83], above). Here it is relevant to the

influential *Bhaṭṭikāvyam* (92) described above, and like it, it is a work which tells the main events of the Rāma-story while simultaneously serving as an explication for the rules of Sanskrit grammar.   This *Rāghavīya*, written in 20 cantos, seems also to have been intended as a *kāvya*-text for use by advanced students of Sanskrit in their mastery of grammar and prosody.

The possibilities of using the narrative ele-
ments of a well-known story in order to emphasize
particular themes or to advance specific ideologies
were not lost on Hindu writers from an early period.
Writers both anonymous and known have used the
larger contours of the Rāma-story, or more often
merely portions of it, or occasionally one or more
prominent personalities from within it, throughout
the long history of Sanskrit literature. The pieces
brought together in this section of the guide cover
a wide range of materials as well as a long period
of time; some of the compositions noted are more
obviously pedagogical in purpose than others. Some
are simply religious works. But despite their
diversity, it seems useful to bring all of these
didactic and religious works together in one sec-
tion. To do so is to emphasize that their common-
ality lies in the use of *Rāmāyaṇa*-motifs for ulter-
ior purposes.

It would be rash to attempt to pinpoint when the
earliest of these efforts was made. Moreover, such
an attempt would be artificial so long as we sepa-
rate from these efforts those made also by the
Buddhists and Jains, whose uses of the Rāma-story
are considered in the next section. Of the mater-
ials pertinent to this section and available in
English translation, no doubt the one composed the
earliest is the narrative in the *Mahābhārata* known
as the "Rāmopākhyāna." This is a section of the
great epic's third book, the "*Āraṇyakaparvan*," and
runs to nineteen chapters, namely 257-275. It comes
at a point in the action after Draupadī has been

recovered and, in response to Yudhishṭhira's lament,
the sage Mārkaṇḍeya recounts the humiliation of Sītā,
similarly abducted, and tells of the events which led
to her eventual rescue. In this recapitulation of
the story--which can be conveniently read in a recent
translation based on the critical text of the *Mahā-
bhārata* (103)--the events end with Rāma's coronation
once back in Ayodhyā. In other words, this early use
of the Rāma-story does not include the later events
of Vālmīki's "*Uttara-kāṇḍa*." One reason given for
this omission accords well with our own rationale for
bringing together this particular use of the Rāma-
story with the other compositions in this section
which also use *Rāmāyaṇa*-motifs for ulterior purposes.
And, that reason points out that the "Rāmopākhyāna"
section of the great epic was placed where it was,
and in truncated form, for didactic considerations--
namely, to emphasize that those who suffer misfor-
tunes (like Sītā/Draupadī, like Rāma and his brother/
the Pāṇḍyas) will eventually see happiness.

Just how early the "Rāmopākhyāna" section of the
Mahabhārata was composed is a matter of no little
scholarly dispute. Some hold that its formulation
preceded Vālmīki's own work and indeed served as a
model for it. According to them, the "*Uttara-kāṇḍa*"
denouement was appended even after Vālmīki's time.
Others contend that the surfacing of the truncated
"Rāmopākhyāna" narrative portion of the great epic in
no way detracts from the integrity of Vālmīki's
seven-part work, which in any case was earlier than
that particular portion of the *Mahābhārata*, and that
the omission of the "*Uttara-kāṇḍa*" matters from the
epic retelling attributed to Vyāsa was simply due to
the fact that the later career of Rāma and Sītā was
superfluous to the didactic intent of citing the well-
known story in the first place. The extremely

complicated issues in the debate of which is older, the "Rāmopākhyāna" section of the *Mahābhārata* or Vālmīki's *Rāmāyaṇa*, may be glimpsed in the discussion provided by the late Professor van Buitenen in the same volume already referred to (ibid., pp. 207-214) as well as in U.P. Shah's "Introduction" to the seventh volume of the critical edition of the Vālmīki *Rāmāyaṇa* (Baroda, 1975:207-214). The late Dr. V. Raghavan has likewise reviewed the pertinent materials (104 [see pp. 11-31]).

This same Dr. Raghavan, in the same work (ibid., see pp. 33-73) also discusses what may have been an early series of efforts to use *Rāmāyaṇa*-motifs in the service of certain ideas, that is, in what is found of the Rāma-story in various of the *purāṇas*. As before, we are here interested only in noting those materials which are available in English translations. We shall thus cite seven *purāṇas*, alphabetically, inasmuch as it is not possible to list the works in chronological order with any certainty. The *Agni Purāṇa* (105) condenses the entire story into seven brief chapters, V-XI, one for each of Vālmīki's seven *kāṇḍas*. This recapitulation is given in the context of other stories pertaining to different incarnations of the Lord Vishṇu, and the religious reasons for the use of the Rāma-legend are clear. Elsewhere in the same *purāṇa*, chapters CCXXXVIII-CCXLII, a large didactic section attributed to the *Rāmāyaṇa* appears in a discourse by Rāma to Lakshmaṇa on warfare, but it cannot in fact be traced to the Vālmīki original. The *Bhāgavata Purāṇa* (106, 107, 108) tells the entire story briefly but with sensitivity in the Ninth Canto, chapters 10 and 11, at times even echoing the words of Vālmīki. Its intent also seems to be to place Rāma in the context of *avatāra*-incarnations of the Lord Vishṇu. Much more originality

is shown in the way the *Brahmavaivarta Purāṇa* (109)
handles parts of the Rāma-story in II:xiv and in
IV:lxii. In the former place, the focus is on Sītā,
her earlier birth as Vedavatī, and her safe refuge in
the fire as a protected, "*chāyā*-Sītā" during the
period of her supposed abduction by Rāvaṇa. In the
latter occurrence, after a recapitulation of the rea-
son for Ahalyā's curse, the Rāma-story is rehearsed
with verve and inventiveness. In both instances, the
effect appears to be to justify an elevated status
accorded to Sītā and Rāma. The *Garuḍa Purāṇa* (110,
111) briefly tells the story twice, back to back, in
chapters CXLII and CXLIII, the first time evidently
as a eulogy to marital fidelity, the second time as a
prelude to recounting other ancient tales. The story
is also recounted twice in the *Kūrma Purāṇa* (112), in
I:xx:17-56 and in II:xxxiv:112-141, in the first
instance giving special emphasis to the *liṅga* Rāma
set up for the worship of Śiva, in the second instance
in praise of Sītā's chastity, commending her for being
as "pure as Pārvatī." In the *Śiva Purāṇa* (113),
Rāma is encountered wandering in the Daṇḍakā Forest
by Śiva and Satī, in II:xxiv:23-xxv:42, and is pre-
sented as one who came to his task on earth at the
instance of Lord Śiva. Finally, in the *Vishṇu Purāṇa*,
IV:iv, the entire story is epitomized in a very few
lines in the context of Vishṇu's manifestations (114).

All of these instances--and others not available
in English translations--demonstrate that the com-
pilers of the *purāṇa*s were aware of the Rāma-story
and felt free to draw from it at will. In all cases,
it seems clear that the Rāma-story was but one among
many which they employed to their own ends. To be
sure, it is also quite possible that the sections
using the Rāma-themes were interpolated into the

*puraṇa*s at a later time when those "ancient" tracts
were recompiled in the wake of the *bhakti* movements.
Whatever the case, it is clear that the *"Uttara-
kāṇḍa"* portions of the Vālmīki original were used by
several of the *puraṇa* writers.

It was probably at a later date, and also pro-
bably in response to impulses generated within the
bhakti movements, that the Rāmaite Upanishads came
to be composed. It seems clear that they reflect an
existing cult of devotion to Rāma, which came as a
later development. Hindu tradition has since accor-
ded four of these Upanishadic productions status
among the "108" most authoritative texts. Three of
these, the *"Rāma-pūrva-tāpanīyopanishad,"* the
"Rāmottara-tāpanīyopanishad," and the *"Rāma-rahasyo-
panishad,"* were translated in the mid-1940s (115),
while the fourth, a Śākta-inspired work known as the
"Sītā-Upaniṣad," came out in the mid-1950s (116). All
of these are reliable translations.

Yet another kind of poetic composition has to be
mentioned in this section, since poetry of the *kāvya*-
tradition has been treated earlier. Sometime between
the 11th and the mid-13th centuries,* there appeared
a sprawling work of more than 32,000 *śloka*s.   It
soon came to be quoted as an authoritative text in
Advaita Vedānta philosophical circles, and it became
so popular that by 1600 A.D., the poem had been ren-
dered from its original Sanskrit into Tamil verse.
The composition is perhaps best known by the title
Yoga-Vāsishtha-Rāmāyaṇa. But it is sometimes also

_____

*Although some scholars insist that it was "cer-
tainly before the ninth century," perhaps somewhere
even between the fifth and ninth centuries.

called the *Mahāramāyaṇa*. Presumably the prefix
"*mahā-*" is appended in deference to the "great" philo-
sophical teachings the poem conveys, though also per-
haps in acknowledgment of its sheer bulk, which
exceeds Vālmīki's original. Or, the "*mahā-*" could be
eulogistically appended in honor of its style and
poetic pretensions. Another name by which it is
recognized is *Arṣa-rāmāyaṇa*, a title which alludes to
its "ancient" origin at the hands of Vālmīki who is,
according to the text, its author.[*] Alternate names
found attached to a work--the Tamil adaptation in
verse of the *Yoga-Vāsishṭha* already mentioned, by
Alavandar Madavapattar, is known as the *Jñāna-*
Vāsishṭham--often merely attest to that work's popu-
larity and by the same token, also possibly to its
importance. We shall refer to this work by the first
of the titles mentioned, as that is also the name
used in the translations of it available in English
(118, 119, 120, 121, 122).

The dramatic invention used by the *Yoga-*
Vāsishṭha-Rāmāyaṇa is that prior to Rāma's departure
with Viśvāmitra, his preceptor, and with Lakshmaṇa,
his brother, on the excursion which takes them
finally to Mithilā, the prince must be roused from a
state of ascetic equanimity which has rendered him
too other-worldly to perform mundane activities. To

---

[*] This claim--that it is a teaching recorded ori-
ginally by Vālmīki himself--is patently a bid for
authority by the author(s) of a much later work. The
dependence on and the presupposition of the Vālmīki
original by the *Yoga-Vāsishṭha-Rāmāyaṇa* can be clear-
ly demonstrated by resort to a close scrutiny of both
works--see (117), pp. 6*ff*.--and need not lead to the
traditional but untenable conclusion that Vālmīki
wrote the *Yoga-Vāsishṭha-Rāmāyaṇa* after having com-
pleted his "other" epic.

engender in him an attitude "proper" for one in the
world, the sage Vasishṭha is called upon to speak to
the young man. What Vasishṭha tells Rāma, then, is
the body of the poetic piece--a didactic contrivance
if ever there was one! The voluminous instruction,
interwoven with some 55 tales and anecdotes, is
divided into six topical sections: on renunciation
(33 chapters), on discipline (20 chapters), on cos-
mogony (122 chapters), on epistemology and psycho-
logy (62 chapters), on egoism's cure (93 chapters),
and on nirvāṇa (128 + 216 chapters). In recent years,
the interwoven tales and anecdotes have attracted the
interest of a handful of American Indologists who
are concerned with identifying their allusive liter-
ary references and their mythic analogues. For our
purposes here, however, the importance of the *Yoga-
Vasishṭha-Rāmāyaṇa* is that, while it is a poem based
on the Rāma-story (and a poem which has literary
merit in its own right), it uses the authority of the
Rāma-tradition mainly to enhance the prestige of the
particular pastiche of Vedānta philosophy mixed with
Sāṁkhya ideas which it seeks to promulgate.

The surfacing of the Rāma-cult in the wake of
the *bhakti* movements brought into circulation other
kinds of literature in addition to those already noted.
There are *māhātmyam*s ["eulogies"] of sacred places
associated with Rāmaism; digests containing guides
for worship for Rāmaites, including *saṃhitā*s and
other tantric-inspired texts; and psalms and songs of
praise addressed to Rāma's Holy Name. Not all of
these categories are represented in the materials
available to us in English translations. Some are
available only in abbreviated condensations; the
so-called *Agastya-saṃhitā*, for example, a digest con-
taining guides for worship of Rāma as the central

figure of a *bhakti* cult of worship, is one such
tantric-inspired work available only in an abbre-
viated résumé (123). In this work,[*] Rāma is identi-
fied with Ultimate Reality. According to the injunc-
tions of this sectarian text--which may have origi-
nated in Banaras--Rāma (or an image into which his
divine presence has been invoked) is to be approached
by means of appropriate and specific *mantras*, *yantras*,
dhyāna, *japa*, *pūjā*, etc. The fact that this text is
mentioned in such works posterior to it as the
Bhusundi Rāmāyaṇa and the *Adhyātma Rāmāyaṇa* indicates
that the *Agastya-samhitā* must have been an influ-
ential text.

The *Bhusundi Rāmāyaṇa* has not yet been trans-
lated into English, but a substantial rehearsal of
its contents is available (124). It is a long work
in four *khāndas*, each of which contains many chap-
ters. The composition is also known as the *Brihad-
Rāmāyaṇa* ("vast," "lengthy") , as *Mahā-Rāmāyaṇa*
("great," "large"--an epithet which could cause it to
be confused with the *Yoga-Vāsishtha-Rāmāyaṇa*, also
sometimes referred to as *"Mahārāmāyaṇa"*), as *Ādi-
Rāmāyaṇa* ("foremost," "premier"), and as *Kuku-
Bhusundi ·Rāmāyaṇa*--which simply demonstrates to the
alert reader of this survey that, as evidenced by its
several alternate titles, this particular restatement
of the Rāma-theme was a popular, widely regarded
piece. As a sectarian text stressing *bhakti* ("devo-
tion") to the Lord Rāma and, further, employing amor-
ous imagery reminiscent of the *Bhāgavata Purāṇa*, it
may be dated in the 14th century. It borrows more

---

[*] Also known as the *"Agastya-sūtīkshna-samvada"*
because it is a dialogue between the sages Sūtīkṣṇa
and Agastya.

than imagery from the *Bhāgavata Purāṇa*--for in it, Rāma is clearly an *avatāra* exercising his *līlā* in much the same way as Krishṇa, when his time comes, will play out his. Sītā, as the divine *avatāra*'s consort, is also given a particularly significant place in the unfolding theology which informs this treatment. The elevated and ideal role given to Rāma in this work may well have influenced Tulsīdās, noted above, because he mentions the *Bhuśuṇḍi Rāmāyaṇa* in the First Book of his *Rāmacaritamānasa*. The influence of this work, indeed, would seem to have extended well beyond the most famous of the writers of the Rāma-story and exerted itself on other authors during the late medieval period (see [144], below, pp. 375-504, especially 490*ff.*)

But one of the most influential reworkings of the theme was to appear not quite a century later, in the late 14th or early 15th century.[*] This was the *Adhyātma Rāmāyaṇa* ("Spiritual Rāmāyaṇa" or "Esoteric Rāmāyaṇa"). A full translation of it in English is available for study (125), and there are at least two substantial introductory essays useful to those approaching it for the first time (126; see also 127, pp. 95-218 passim). Like Vālmīki's version, it, too, is divided into seven *kāṇḍa*-sections; they bear the same names as in the original *Rāmāyaṇa*. But the entire work, while it follows the familiar story with remarkable fidelity, is considerably shorter. Altogether it contains only some 4300 verses in 66

---

[*]This date obviously exludes the possibility that the *Adhyātma Rāmāyaṇa* influenced Kamban's earlier work. Similarities between the two works must be explained by other means. The *Adhyātma* text makes mention of "diverse Rāmāyaṇas" (Ayodhyā IV:77).

chapters--"*Bālakāṇḍa*," "*Ayodhyākāṇḍa*," "*Araṅyakāṇḍa*,"
"*Kishkindhākāṇḍa*," "*Sundarakāṇḍa*," "*Yuddhakāṇḍa*," and
"*Uttarakāṇḍa*, containing, respectively, eight, nine,
ten, nine, five, sixteen, and nine chapters. Through-
out, several philosophical discourses are added,
making it clear that the primary purpose of this work
--however well it rehearses the narrative while at
the same time adding its own innovative touches--is
to provide an Advaita philosophical base for Rāmaite
cult teachings. In this document, Rāma is an omni-
scient, cosmic being whose willingness to obey the
dictates of an assumed human destiny is the pretext
for accomplishing his divine purposes.[*] Further,
Sītā is treated as the eternal consort of the Lord.
Accordingly, the closing events of the traditional
story--Sītā's abandonment, the birth of Lava and Kuśa,
the final separation of Sītā and Rāma--seem to be
employed chiefly as a resolution for getting the cos-
mic couple eventually reunited in Vaikuṇṭha (see
"*Uttarakāṇḍa*" IV:32*ff*.)

A number of devices used in the telling of the
Adhyātma Rāmāyaṇa are worth noting in regard to
parallels found in other, similar works, whether ori-
ginating in those other texts or employed by them
later under the influence of the *Adhyātma*. For one
thing, the whole is set within the framework of a
dialogue between Mahādeva (Śiva) and Pārvatī, the
latter asking her lord why, if Rāma is the Supreme
Being, he had to be reminded of his true identity
during the course of his sorrow over the loss of Sītā
(see "*Bālakāṇḍa*" II:6*ff*., cf. "*Uttarakāṇḍa*" IX:69 et

---

[*] See the dialogue introduced in the opening
chapter of "*Ayodhyākāṇḍa*" between Rāma and the sage
Nārada.

seq.). Śiva's complete answer to this query is, of
course, the bulk of the composition. This kind of
framework dialogue is a common pattern found in the
medieval religious literature of the *āgama*s, *tantra*s
and *saṃhitā*s, and in fact what is found as the inner
core of the *Agastya-saṃhitā*, noted above. It is also
a conceit preserved by Tulsīdās later in his *Rāma-
caritamānasa*. For another thing, the brief descrip-
tion of the childhood antics of Rāma is reminiscent
of the boyhood pranks of Krishṇa celebrated in the
Bhāgavata Purāṇa and elsewhere; this is but another
instance of what has been referred to as the "bhāga-
vatization" of the Rāma cult along about this time.
Still another thing is the fact that it is King
Daśaratha's realization that he is aging which
prompts him to abdicate in favor of his son, Rāma
(see "*Ayodhyākāṇḍa*" II:3)--a detail we have already
noted in Kālidāsa's earlier *Raghuvaṁśa* and in
Tulsīdās' subsequent *Rāmacaritamanasa*. Also of note
in the *Adhyātma Rāmāyaṇa* is the theme of a "protected"
Sītā used as a device to maintain her chastity when
under Rāvaṇa's domination; in this case the "real"
Sītā is made to reside in a fire while an "illusory"
Sītā is abducted, the "real" Sītā being restored from
the flames after Rāma's triumph over Rāvaṇa (see
"*Araṅyakāṇḍa*" VII:1-4 et seq. and "*Yuddhakāṇḍa*" XIII:
19*ff.*). This is used later by Tulsīdās, just as it
seems to have been prefigured in the *Brahmavaivarta
Purāṇa* II:xiv:30*ff.* (109 [I:127*f.*]), in the *Kūrma
Purāṇa* II:xxxiii:115*ff*, (112 [pp. 479-481]), and
elsewhere (reportedly in the *Adbhuta Rāmāyaṇa* and in
the *Yoga-Vāsishṭha-Rāmāyaṇa* in similar but not iden-
tical ways). Yet another thing in the *Adhyātma Rāmā-
yaṇa* deserves notice, this also in regard to the
abduction of Sītā by Rāvaṇa: here Sītā <u>seems</u> to be

lifted up by Rāvaṇa along with the earth around her
(?"*Araṅyakāṇḍa*" VII:51*f*.), a convention used earlier
in Kamban's version (36, 37, 38) and, even earlier,
in a Tibetan version (50). This action seems, at
least in the *Adhyātma*, vaguely redundant in view of
the fact that the "real" Sītā is already safely "pro-
tected" in the fire. A final thing to remark is the
series of eulogies on the text itself and/or on the
salvific power of repeating the Holy Name (see "*Bāla-
kāṇḍa*" I:22*ff*., 29; "*Araṅyakāṇḍa*" IV:48; "*Kishkindhā-
kāṇḍa*" I:84, VI:75*ff*.; "*Uttarakāṇḍa*" I:63, IX:64;
etc.). This attitude was to have a pronounced influ-
ence on Tulsīdās, and is certainly one which reflects
something essential about the later development of
Rāma-*bhakti* (cf. 123 [18 and 6*f*.]).

In addition, there are three passages of the
Adhyātma Rāmāyaṇa text which have also become impor-
tant to later Rāma *bhakta*s; these remain crucially
significant to them even today. All three passages
are memorized, repeated, and meditated upon by the
pious. They are the so-called "*Rāma-Gītā*" section,
which is the same as "*Uttarakāṇḍa*" V:7-62 (cf. *Bāla-
kāṇḍa*" I:46-58); the "*Rāmahṛidaya*" passage, which is
found in "*Bālakāṇḍa*" II:44-56 (cf. "*Bālakāṇḍa*" I:43-
45); and the "*Rāma-mantra*," one version of which is
articulated in "*Araṅyakāṇḍa*" VIII:34-35.[*]   There is
reason to believe that all of these are older than
the *Adhyātma Rāmāyaṇa* text which contains them. But
that book, too, has taken on a sanctity in its own
right, and it is regularly repeated in toto as part
of the *Rāma-navamī* festival of nine days each spring

---

[*]A fourth passage may also be noted as having
gained great authority, that is, Ahalyā's hymn to
Rāma, found in "*Bālakāṇḍa*" VI:43-59.

season in *Caitra*-month when Rāma's birth is commem-
orated (cf. *"Bālakāṇḍa"* I:38-41, 59-60).

Beyond the influence it had upon Tulsīdās who,
as we have already noted, is one of the most widely
known popularizers of the Rāma-theme, the *Adhyātma
Rāmāyaṇa* was also translated into other languages.
Most noteworthy among those translations was the one
into Malayalam, done in the latter part of the 16th
century by Tuñcat Rāmānujan Ezhuttaccan (128). This
poet-saint from the *śūdra*-ranks is known as the
"Father of Modern Malayalam" and the "Prince of
Malayalam Poets." It is not merely hyperbolic to say
that every Hindu home in Malabar had its copy of this
work--his version of the *Adhyātma Rāmāyaṇa* being
known also as the *Ezhuttaccan Rāmāyaṇa*. Even today
there are many Malayali-speaking Hindus who read por-
tions of the *Ezhuttaccan Rāmāyaṇa* (= *Adhyātma
Rāmāyaṇa*) every day.

Another work of interest at this point, one
which also reflects the development of the Rāma-cult
which surfaced in the wake of the *bhakti* movements,
is the *Adbhuta Rāmāyaṇa*. This is available in Eng-
lish only in the form of a summary (129) and a dis-
cussion (130). It purports to be the "eighth" *kāṇḍa*
of Vālmīki's original, but it is patently a late
work; in fact, it is a comparatively modern composi-
tion. Its most noteworthy feature is that in it
Sītā, as Rāma's *śakti*, is exalted above Rāma as more
powerful than he. At least in the closing chapters
(*sārga*s 17-27), in imitation of the *Devī Māhātmyam*
and reminiscent also of the Bengali version noted
above on page 48, Sītā is no longer the gracious
female figure of Vālmīki's vision but appears as a
gaunt, hungry, unkempt ogress complete with a garland
of skulls and a lolling tongue. While Rāma's feat of
slaying the ten-headed Rāvaṇa is acknowledged, it is

given to her to dispatch the thousand-headed Rāvaṇa
as well as his armies. Also calling itself, some-
what ingenuously, the *Ārṣa Rāmāyaṇa* ["The Ancient
Rāmāyaṇa" (cf. *Yoga-Vāsishṭha-Rāmāyaṇa*, above)], this
Adbhuta Rāmāyaṇa stands as a monument to a curious
effort to blend Śaiva Śāktism with Vaiṣṇavism.
According to Grierson (129 [p. 15]), " ... Its chief
value is as a storehouse of folk-legends," most of
which materials are not found elsewhere associated
with the Rāma-story.

Sometime late in the 18th century, a South
Indian writer named Rāmabrahmānanda produced a work
of some 186 chapters called the *Tattvasaṃgraha Rāmā-
yaṇa*. Although it is not available in translation,
a detailed description of it has been prepared and
published (131). Like Vālmīki's original it, too, is
divided into seven *kāṇḍa*s (containing 35, 32, 20, 18,
17, 42, and 22 *sarga*s respectively). The best way to
describe it is as a thesaurus, or treasury, of uplift-
ing Rāma-lore. As such, it is an important document
for giving insight into how the Rāma-cult of not very
long ago used the Rāma-story in order to inculcate
ideals; hence it serves as an index to the basis for
the content of the faith of the late 18th century.
The "*saṃgraha*" in the title points to the antholo-
gical nature of the piece, which quotes, among other
works, the already-mentioned *Rāma-tāpanīyopanishad*s,
the *Agastya-samhitā*, and the *Adhyātma Rāmāyaṇa* as
well as several *purāṇa*s; the "*tattva*" in the title
indicates that the collection seeks to present the
inner truth and esoteric significance about the fig-
ure (Rāma) who stands at the center of the Rāmaites'
living faith.

Finally, the many psalms, *stotra*s, and songs of
praise which also issued from within the Rāma-cult
should be given their due. Most of these selections

currently in translation lie scattered here and there
in monographs (e.g., [151], below) where the mater-
ials used may be cited merely as incidental illustra-
tion given to enhance a particular thesis. But in
at least one case, more than 500 songs of one compo-
ser have been brought together and translated, thus
making available among them page after page of some
of the composer's choice lyrics in praise of his cho-
sen deity, Rāma (132). This composer is Tyāgarāja
(1767-1846), the Karnatic musical genius and saint
who saw in the fashioning of musical statements a
path of salvation [*gāna-mārga*] equivalent to other,
more conventional paths of wisdom, works and worship.
The fervor of his faith and the eloquence of his
lyric testimony render these songs useful study
pieces for the student who would seek to learn more
about how faith in Rāma asserted itself in a particu-
lar, gifted individual. Although many of Tyāgarāja's
songs were written in Telugu, many are also conveyed
in Sanskrit--for which reason his work is mentioned
here rather than above in the section on popular
regional versions.

Mysore Government Press, 1892). General contours of poem, pp. 9-16; verse-by-verse condensation in English, 17-95 (orig., pp. 7-12 and 13-76, respectively).

The use of elements taken from the Rāma-theme is not limited to Hindu sources. Two Buddhist versions of the story (51, 52) have already been noted, and the Jainas as well drew from the rich heritage, fashioning their retellings to inculcate Jaina religious values. In later times even the Sikhs celebrated the heroic figure of Rāma. The tenth Guru, Govinda Singh (1666-1708), wrote 864 cantos about the Prince of Ayodhyā, employing 71 different types of meter in the process (see [144], pp. 510-533). But very few of these extra-Hindu Indian versions are available in English translations, and we must limit our attention to those available for English-reading students.

Vālmīki's *Rāmāyaṇa*, despite its preëminence as "*Ādi-kāvya*," was not the first time a Rāma-related tale was ever told. Evidently, even Vālmīki shaped his narrative from numerous, "floating" stories. What makes his version so authoritative is the coherent manner in which he puts the various composite elements together, stamping the whole with the genius of his epic vision. One of the earliest, "other" surviving versions of Rāma's heroic adventures is found not in a Sanskrit text, but in a Pāli canonical scripture of Buddhism. It is a piece which probably predates Vālmīki--but that depends, to be sure, on when one chooses to date "Vālmīki," and how early or late one decides to place the *Jātaka* materials as we have them. It is usually numbered "461" in most collections, and is called "*Daśaratha*

Jātaka" (133, 134). In it, Rāma is treated as a
bodhisattva-figure in one of the Buddha's former
births.

In that Buddhist version of Rāma's youth, exile
and return, there is, however, no mention of Rāvana,*
nor is Sītā abducted. In it, in fact, Sītā is Rāma's
sister and they, along with Lakshmana, are the off-
spring of Daśaratha, King of Banaras, and of his
senior queen. When their mother dies, her co-wife/
successor wants her own recently born son, Bharata,
to become heir apparent. That prompts Daśaratha to
send Rāma, Sītā, and Lakshmana from the kingdom for
their safety for a period of [n.b.] twelve years.
They retreat to a hermitage in the Himalayas. In
their absence their father dies, whereupon Bharata
seeks them out and petitions the three to return.
Rāma, however, says that he feels compelled to obey
his father's wish and to remain in exile for the full
twelve years. He does, nevertheless, send Sītā and
Lakshmana back with Bharata. That trio rules in his
stead, all the while honoring his straw slippers: if
the slippers remain silent, the rulers' decisions
are deemed proper, but if the slippers knock against
one another, further adjudication is thereby thought
necessary. At the end of the twelve years, Rāma
returns and, with Sītā as his consort, is crowned
king. They rule together for 16,000 years.

---

* Rāvana, whose career in Indian folklore is not
limited to that one episode in which he was stricken
by a passion for Sītā, was too popular a figure for
the Buddhists to ignore altogether. He is seen later,
for example, in the opening chapter of the
Laṅkāvatāra Sūtra where he appears as a learned inter-
locutor.

Another *Jātaka*, numbered "540" (133, VI:38-52),
is reminiscent of Vālmīki's story of Daśaratha's
shooting of the ascetic with blind parents. The
Buddhist birth-stories numbered "532" and "526"
(ibid., V:79-84, 100-106) parallel elements Vālmīki
incorporated into his episodes concerning
Rishyaśriṅga early in the "*Bāla-kāṇḍa*." And, though
less obvious, similarities to Vālmīki's narrative are
also found in the so-called "*Jayaddisa Jātaka*,"
numbered "518" (ibid., V:42-48), and "*Vessantara
Jātaka*," numbered "547" (ibid., VI:246-305).

One can view the adaptation of the Rāma-story
to Buddhist doctrinal requirements by looking at the
appearance of versions of the epic found in countries
outside of India where Buddhism flourishes as a reli-
gious presence and cultural determinant, as, for
example, in Burma. But to consider that process of
acculturation of the *Rāmāyaṇa* to non-Hindu systems
further here is to venture beyond the scope of the
present bibliography. Some suggestions for further
study in this regard are given in the final, closing
paragraph of this guide. At this point, it may suf-
fice for our purposes to illustrate how elements of
the Rāma-story were adapted to the needs of a non-
Hindu religion by looking only at how the Jainas
handled the Rāma-theme.

The earliest full-fledged Jaina narrative of
Rāma, dating perhaps to the third century C.E., sets
the precedent for what in subsequent Jaina Rāmāyaṇas
were to become standard modifications of the story's
elements. Just as in Buddhist retellings where Rāma
is a *bodhisattva*, so in the Jaina recastings all of
the major characters are devout Jainas. They eat no
meat; sacrifices are condemned because they involve
the slaughter of animals; conquest in battle is
achieved by prowess and wit rather than by violence

and murder. In keeping with Jaina rationalistic
perspectives, there are no supernatural beasts or
demons; the monkeys and the *rakshasa*s are, instead,
"*vidyādhara*s," beings who have acquired magical
powers by virtue of their extraordinary austerities.
Indeed, miracles throughout are muted; Sītā is of
natural birth; Rāvana has but one head; and there is
no mention of a golden deer. Such savage habits and
demonic proclivities as may characterize a being are
due to the accumulations of *karma*--and such beings
are portrayed as victims, and with sympathy. Thus,
changes in plot and motivations are prompted by con-
cerns to stress Jaina values and principles; Jaina
doctrines and beliefs are frequently set forth. Gone
are the brāhmanical sages as models (Vasishtha,
Viśvāmitra, Agastya, et al.); in their places are
ascetics and holy men of the Jaina mold. The Jaina
versions of the *Rāmāyana*, incidentally, usually con-
tinue up through the birth of the twin sons, the
final separation of Rāma and Sītā, etc. This sug-
gests that, even from earliest times (before
Kālidāsa, as already noted on page 79), the Jainas
evidenced a willingness to deal with the events also
contained in Vālmīki's *Uttara-kānda*. Yet, while
there is congruency at this point, in general the
changes of detail introduced by the Jainas into their
adaptations of the Rāma-narrative amount to a radi-
cally different accommodation of the "floating"
stories than seen elsewhere.

That earliest Jaina narrative of Rāma just
alluded to is the *Paumacariya* (= *Padma-carita*), by
Vimalasūri. It was written in a form of Prakrit
known to have been used by Jainas in Maharashtra in
the early centuries of the Common Era. This work,
which proved to be popular and, thus, influential on

subsequent Jaina writers, is not available in a full
English translation; however, an extensive discussion
of its contents and a helpful résumé are available
(135; see also 136).

One of the most important, later compositions
influenced by Vimalasūri's accommodation of the epic
tradition was the so-called *Jaina Rāmāyaṇa*. It is
available in a full prose translation (137), and
students would be well advised to turn to it to sam-
ple the Jaina handling of the Rāma-story. This com-
position was written in Sanskrit by the 12th century
polymath, Hemacandra, almost a millenium after
Vimalasūri. Hemacandra's handling of the Rāma-story
is done in ten chapters containing more than 3700
verses, and is part of a much larger work in which he
is concerned with showing how various figures known
to Jainas from Indian mythology and hagiography were,
indeed, models of Jaina ethics. It contains most of
the elements which by his time had become normative
to Jaina Rāmāyaṇas; specifically, Hemacandra's ver-
sion, like Vimalasūri's also, represents a Śvetāmbara
Jaina outlook.

But Hemacandra's so-called *Jaina Rāmāyaṇa* was
both preceded and followed by other, notable Jaina
renderings of the theme. Only one need detain us
here, since it is the only one accessible to readers
limited to English-language materials. A detailed
résumé of it is available (138). It is also a 12th
century work, but it comes from South India, where it
was originally composed in Kannada, the regional lan-
guage of the modern state of Karnataka. Because of
its southern origin it may represent Digambara Jain
sentiments. Written in the mixed verse-and-prose
style known as "*campu*," it is properly called the
Rāmacandra-carita-purāṇa ("The Ancient Story of Rāma

[candra]"), although it is quite regularly referred
to as the "*Pampa Rāmāyaṇa*." Its author was
Nāgacandra, sometimes also called "Abhinava Pampa,"
that is, a "latter-day Pampa," an allusion to his
literary skill, which was reminiscent of the 10th
century Pampa, the greatest of all authors in the
Kannada language. Nāgacandra's creation is, then,
both a regional recasting of the Rāma-story into a
vernacular tongue and an intentionally elegant work
of literary craftsmanship. Consequently, it deserves
notice alongside the various popular, regional ver-
sions of the Rāma-story noted above, as well as along-
side the several poetic works in the *kāvya*-tradition
already mentioned. It is discussed here, however,
because it is first and foremost, for our purposes, a
Jaina piece. As such, it deserves close comparison with
the almost contemporary piece by Hemacandra just
noted. The latter (in Sanskrit) was more interested
in Jaina polemics, while the *Rāmacandra-carita-purāṇa*
(in Kannada) is more clearly a work animated by poetic
considerations.

While Hemacandra commenced his tale with the
origins of Rāvaṇa and of the *vānara*-hordes,
Nāgacandra salutes his predecessors who have told the
story of Rāma before him, and he begins his exposi-
tion with the genealogy of Daśaratha. Both Nāgacandra
and Hemacandra agree in calling Rāma's royal mother
Aparājitā, as did also Vimalasūri. Both give Sītā a
natural birth as a twin, and her male sibling,
Prabhāmaṇḍala [Nāgacandra] or Bhāmaṇḍala [Hemacandra],
is kidnapped at birth only to be brought back into
the story later; he causes Sītā much trouble before
their blood relationship is recognized (again, both
following Vimalasūri). In both versions Daśaratha is
prompted to abdicate after hearing a sage's account
of his former lives (just as in Vimalasūri); he

prefers the life of a renunciant. In both versions
(again following the lead of Vimalasūri), Rāvaṇa's
character rises to heights left unexplored ·in ·
Vālmīki's original and, with the notable exception
of Kamban who wrote about the same time, not imagined
by other authors recasting the Rāma-story into
regional versions during the same time frame. In
both versions (as in Vimalasūri), Sītā is abandoned
after Rāvaṇa's death and her own reunion with Rāma;
whereupon, after the birth of her twin sons, and an
ordeal designed to prove her purity, Sītā takes up
the habits of a Jaina nun for the remainder of her
days. As for Rāma, after Lakshmaṇa's death (follow-
ing Vimalasūri), he keeps his brother's corpse for
many months, then enters the Jaina order as a monk,
performs heroic mortifications and finally achieves
liberation. To be sure, there are significant and
numerous differences in detail between the two
versions (and between each of them and Vimalasūri,
too). In fact, it is difficult to know which is
more useful in considering the two nearly contempo-
rary Jaina versions of the Rāma-story: the differ-
ences or the similarities between Nāgacandra and
Hemacandra. Either way, their comparison with Hindu
versions of the tale will prove instructive to stu-
dents interested on the one hand in discovering
something about Jaina popular polemics in the context
of a predominantly Hindu culture and, on the other
hand, in seeing how a legend such as the Rāma-story
undergoes yet another radical transformation while
still remaining recognizable in its general contours.

The preceding bibliographic guide has sought to identify only major literary variants based on the Rāma-story, limiting notice to those compositions originating in India which are available in English translation or resumé. A student unfamiliar with the breadth of Indian literature must be reminded that what has been noted above is merely a small number of the hundreds of Indian literary documents based on elements of the Rāma-epic. Most remain in their original languages. What has been provided here is but a sketchy delineation of the tip of the proverbial iceberg; the bulk remains hidden from view.

For those who wish a view of the broader scope which includes mention of works still untranslated, the pioneering work already mentioned by Father Camille Bulcke (see page vii, above), will soon be available in English from an Australian press. Meanwhile, shorter surveys in some of the works cited in the foregoing sections also provide useful, panoramic introductions to the Rāma-literature of Indian origin (e.g., 44, 45, 65). It might be more helpful to turn to one of the many essays specifically designed to provide an overview of the influence of the Rāma-theme on Indian literatures (e.g., 139).

In the preceding pages there are only occasional notices of the innumerable works reflecting upon and analyzing the primary texts named in this guide. No attempt has been made herein to identify commentaries on the texts. Because the number of base-texts is large and, accordingly, their various interpretations

--whether classical or contemporary--are even more
numerous, a separate bibliography would be. desirable
in order to account for them adequately (even though
the actual count of such derivative reflections in
English translation is not great). In addition, stu-
dents concerned with locating pertinent, secondary
studies which treat various aspects of the specific
compositions here cited, including materials relating
to text-critical studies and to considerations of
historical or thematic contexts, must realize that
there is as yet no integrated and comprehensive
instrument for bibliographical retrieval of such
studies. Renou's and, later, Dandekar's Vedic bibli-
ographies (1931 and 1946, respectively) simply
exclude *Rāmāyaṇa*-related references as being outside
the scope of their otherwise impressive surveys--as
does also, regrettably, a recent American enterprise
of ambitious dimensions (140). A.D. Pusalker
attempted in 1942 to review what had been done in
Rāmāyaṇa-related studies in the preceding decade or
two (141); and, a year later, M.A. Gore followed with
a bibliography containing 366 entries specifically
on *Rāmāyaṇa* texts, editions, translations, adapta-
tions, critical literature, studies and articles
(142). But the first was obviously limited in scope,
and the second was faulted by reviewers of the time
as inadequate to the task even then. Since the '40s
countless additional books, essays, articles in
journals, chapters in anthologies, new editions and
translations have appeared. But they remain scat-
tered and, for the most part, uncatalogued for
retrieval purposes. There is at present (early '80s)
under production at Pune, India, an encyclopedic
bibliography on *Rāmāyaṇa*-related scholarship. The
work is being undertaken by a government-recognized
research and cultural institute called the "Shreeram

Kosha Mandal." It remains to be seen how effectively this group will be able to bring together—and to publish the results so that others may use them—so many diverse resources on the same subject. It is not yet clear what proportion of the entries in the proposed bibliography will refer to English-language materials.[*]

The present writer has recently compiled a listing (not annotated) of more than 800 titles of secondary studies based on *Rāmāyaṇa*-related themes, noting monographs, chapters in books, published articles and the like in English. These materials are arranged in such general categories as "textual studies," "interpretive essays," "character analyses," "literary and thematic inquiries," as well as around such controversial topics as "dates of authors/texts," "location of Laṅkā," and so on. It is hoped that, like the present bibliography, that listing will one day be made available to interested students and teachers.

Meanwhile, for those who wish to acquaint themselves with some of the current issues and interests in *Rāmāyaṇa*-related research, a good place to begin is in the introductory sections in each of the seven volumes of the Baroda Critical Edition of the Vālmīki text (143). Those seven essays are in English, although their approaches may be too advanced for beginning students. The *Journal of the Oriental Research Institute, Baroda* has in recent years published a number of significant studies by scholars involved in the production of the critical edition of

---

[*]Further information may be sought by writing to Shreeram Kosha Mandal, 1194 Sadashiv Peth, Pune - 411 030, India.

the Vālmīki *Rāmāyaṇa*. Back issues may be culled for
treatment of topics specific to one's interests.
Beyond these, the *Proceedings and Transactions* of the
All-India Oriental Conference, held at regular inter-
vals since its inception in 1920, invariably contain
sections with papers on *Rāmāyaṇa*-related matters.
Many large libraries in North America as well as
India hold back issues of the publications commemora-
ting those ongoing conferences, which are not, how-
ever, to be confused with the single meeting, in
1972, of the All-India Ramayana Conference, which pro-
duced a single *Souvenir* volume (1973). In addition,
the Sahitya Akademi (National Academy of Letters) in
New Delhi contemplates the formation of an Interna-
tional Ramayana Society as an outgrowth of an Inter-
national Ramayana Seminar organized in 1975. Papers
from that 1975 seminar have been published by the
Akademi in a volume entitled *The Rāmāyaṇa Tradition
in Asia* (144), and the contents of that solid volume
provide rewarding reading for interested students on
the variants on the Rāma-theme found in India as well
as in South and Southeast Asia. In fact, no single
book can compare with this one for variety of treat-
ments coupled with rigor of scholarship. It is
highly recommended for anyone seriously interested in
Rāmāyaṇa-related studies.

At the beginning of this guide, the focus was
stated to be mainly on the <u>literary</u> variants of the
Rāma-theme which originated in India. Accordingly,
notices of *Rāmāyaṇa*-inspired motifs finding expres-
sion in cultural phenomenon that do not ordinarily
qualify as "texts" have been omitted. Suggestions as
to some directions interested readers may take in
order to acquaint themselves further with the mani-
festations of the Rāma-theme in Indian literature

generally, in art and in popular performance, are set forth in this postscript.

Because allusions to Rāma and his company are so numerous and diffuse in Indian literary works, it would be impossible to catalogue all such occurences. Vālmīki and/or other shapers of the Rāma-tradition are quite often quoted. Sometimes allusions to the epic-theme may be substantial and other times made merely in passing. In order to make the frames of reference more concrete here, two different (but not unrelated) sources are here cited as paradigmatic for what remains for further consideration. In the first instance, one finds illustrated in context how the saga of Rāma is referred to, and tersely recapitulated, among other stories told serially. In "The Ocean of Story," or the *Kathāsaritsāgara* (145--a kind of Hindu "Arabian Nights"--by Somadeva, an 11th century Kashmiri poet), the story of Rāma is rehearsed in two different places. In one it is told in four paragraphs, and in the other in only one. In the second instance, the citation is to an article which collates quotations in Indian *katha*-literature (i.e., stories, fables, anecdotes, legends, etc.) from the *Rāmāyaṇa* (146; cf. [104], above). These two references serve to call attention to other ways in which the consciousness of the Rāma-story has insinuated itself into Indian literature.

As for manifestations of the Rāma-theme in the visual arts of India, modern scholars appear to have explored them but little. Particularly when compared with the many monographs on Krishṇa-themes found in Hindu sculpture and painting, the paucity of materials on Rāma-related motifs is the more notable. No doubt many art historians have correctly identified in passing the stone and metal likenesses

of Rāma and his entourage as well as temple sculp-
tural programs and miniature and mural paintings
deriving from the Rāma-story; but there seem to be
few observers who have felt moved to bring together
all the evidence to demonstrate how widespread the
phenomenon is. Students interested in the visual
arts may, nonetheless, find assistance in their own,
private explorations of such matters by looking at
four fairly recent publications. The first, which
is both the most recent and probably the most elo-
quent testimony to what remains to be done, is by
the late, eminent Indian art historian, C. Sivara-
mamurti (147). His seventy illustrations serve to
document the variety of time and place which yields
up visual art inspired by the Rāma-story, more tho-
roughly than heretofore found in any other single
book. The second publication is by K.S. and
Subhashini Aryan, who have done for the art deriving
from the Hanumān cult (148) what no one else has done
before. The third is by the gifted and articulate
authority on the visual and performing arts in South
Asia, Dr. Kapila Vatsyayan (149). Dr. Vatsyayan,
at this writing the Joint Educational Adviser in the
Ministry of Education and Culture of the Government
of India, has provided an informative overview of a
complex subject in her readable book. The final pub-
lication noted here is by J. Mittal (150), who takes
the miniatures in an 18th century illuminated manu-
script of the *Rāmāyaṇa* as the basis for a study of
painting in South India.

Much remains to be done. Folk art renditions
of the Rāma-theme still stand neglected. Nonethe-
less, the persevering student who turns to one or
more of the four books just mentioned will find clues
which will lead to some of the (relatively few)

available studies in the visual arts which treat
Rāmāyaṇa-inspired imagery.

Students interested in how the Rāma-story influ-
ences contemporary performance have several books
available to them, three of which are noted here.
These three provide, among other things, insight into
the colorful "Rāmlīlā" pageants staged outdoors each
September/October throughout Northern India, dramatic
cycles celebrating Rāma's heroic divinity according
to Tulsīdās' interpretation. The best among these--
and a must for serious students--is Norvin Hein's
study (151) based on his observations in the Mathurā
region in North India. Hein provides good historical
treatment of the form itself, and also gives some
literal translations of the Hindi accompaniment
recorded at actual performances. The others (152,
153) are both more general works, one written by the
Indian theatre historian Balwant Gargi, who clearly
describes what goes on during "Rāmlīlā," and the
other written by the perceptive Dr. Kapila Vatsyayan,
who knows firsthand the performers' concerns and who
therefore approaches the various performing arts with
an intimacy and immediacy difficult to gainsay.
Either of these two latter treatments are recommended
to students with no prior knowledge of Indian drama-
tic traditions.

Finally, it remains to indicate how the moti-
vated student may move out from the confines of this
bibliographic essay focusing on Indian variants on
the Rāma-theme, into Greater India, where the Rāma-
story in manifold form has been so well known for so
many centuries. B.R. Chatterjee's short essay in
The Cultural Heritage of India, available in many
college libraries, is a good starting point for the
beginning student. It is brief, yet provides cogent
detail (154; see also [46], above). The motivated

student may well find V. Raghavan's book-length
treatment, *The Ramayana in Greater India* (155), more
satisfying still. Separate chapters of the book are
given over to the theme as it manifests itself in
Sri Lanka, Tibet, Khotan, Mongolia, Siberia, China,
Japan, Laos, Champa, Cambodia, Thailand, Indonesia,
the Philippines, and Burma, the countries' names,
indeed, serving as the chapter titles. Throughout
his book, the late, great scholar afforded leads to
the works of others where specific matters may be
found treated more fully. The subject is, to be sure,
a vast one. Some of the same areas are also treated
in papers constituting *The Ramayana Tradition in Asia*
already mentioned (144). A volume under preparation
by Professor Suresh Awasti of Delhi University, con-
taining contributions by various authorities, will
specifically feature essays dealing with the *Rāmāyaṇa*-
tradition in the arts in such countries as Burma,
Cambodia, Indonesia, Laos, Malaysia and Thailand.
Indeed, the area of study of the Rāma-traditions in
Asia is so vast that the student is perhaps best
advised to approach the study on a country-by-country
basis, whether dealing with the transformations of
the story in those regions or with the arts. In any
case, however inviting the pursuit of such investiga-
tions may seem to users of this guide, the *Rāmāyaṇa*-
related traditions outside India present another sub-
ject altogether, one beyond the scope set for the
systematic treatment herein provided.

INDEX
of
AUTHORS, EDITORS, TRANSLATORS and TITLES

H. DANIEL SMITH (b. 1928) is Professor of
Religion at Syracuse University, where he has
recently completed twenty-five years of teaching
undergraduate courses focusing on Hinduism. Since
1981, he has regularly offered a course for fresh-
men on the *Rāmāyaṇa* of Vālmīki as part of the
"Great Works" cluster in the College of Arts and
Sciences.

Professor Smith's previous publications in the
FACS South Asian Special Publications Series are
*The Picturebook Ramayana: An Illustrated Version
of Valmiki's Story* (1981) with M.N. Chary, Susan
Farber, M.S. Kumaraswami and A. Manivelu; and *The
Smith Āgama Collection: Sanskrit Books and Manu-
scripts Relating to Pāñcarātra Studies--A Descrip-
tive Catalog* (1978).

Among his other contributions to Indic studies
are two volumes in the Gaekwad's Oriental Series,
University of Baroda (India), *A Descriptive Biblio-
graphy of the Printed Texts of the Pāñcarātrāgama*
(Vol. 158 in 1975 and Vol. 168 in 1980); an antho-
logy printed in Madras, *A Sourcebook of Vaiṣṇava
Iconography according to Pāñcarātrāgama Texts*, with
K.K.A. Venkatachari (1969); and a series of eleven
documentary films depicting Teṉkalai Śrī-vaiṣṇava
Brahmanical rites and celebrations in urban South
India (1969-70). Professor Smith has also contrib-
uted numerous articles to journals and anthologies.

MAXWELL SCHOOL

Founded in 1924, the Maxwell School of Citizenship and Public Affairs has been educating young men and women for public service and for academic and research careers for over 50 years. Today the Maxwell School comprises a unique combination of disciplinary departments (Anthropology, Geography, History, Political Science, Public Administration, Social and Political Psychology, Sociology), degree granting programs (International Relations, Public Affairs, Social Science, Development Planning) and professional, research oriented non-degree programs (Foreign and Comparative Studies, Health Studies, Metropolitan Studies, and Mid-Career Training). Of the School's candidates for advanced degrees about half are in the traditional social science departments and the other half in inter-disciplinary programs.
